Grant

Scientific Equipment

Catalogue 2016

Precision temperature control, sample preparation and life-science products for the world's laboratories.

About Grant Instruments

Grant Instruments (Cambridge) Ltd has been designing and manufacturing precision scientific equipment for over 60 years, with hundreds of thousands of Grant's renowned water baths sold worldwide.

The current range of Grant laboratory products continues the same successful philosophy which centres on design excellence and high quality build to provide key customer benefits:

- Accurate and consistent performance
- Ease of use
- Long and reliable working life
- Long term value for money

In addition Grant products are supported by:
- A comprehensive warranty
- An industry leading service and support network
- On-going technical and application support from experienced, qualified engineers
- Traceable calibration services for all Grant products
- Manufactured under an ISO9001:2008 quality system, meeting applicable CE, WEEE and RoHS directives

Grant has recieved approval by the CSA to test its own products to their rigorous standards and apply the prestigious CSA mark to compliant products under their category program.

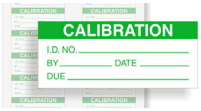
About Grant Services

TRADE IN AND SAVE

Grant is pleased to offer a trade-in facility for unwanted or broken equipment, either manufactured by us or not, against any new product purchase (subject to terms & conditions). Grant are fully compliant with the WEEE directive.

EXTENDED WARRANTY

Extended warranty is available on the Grant Scientific range in addition to our standard warranty. You have the option to extend your cover to a maximum of 5 years from time of purchase. This is not available for all regions and products so please contact us for further information.



As part of our value-added support we offer a UKAS traceable calibration service for new scientific products and those already in service.

Grant

Grant has a long history of designing and manufacturing bespoke temperature control solutions and have a dedicated in-house team to manage all aspects of the process from start to finish - ensuring quality, continuos customer involvement and satisfaction along every step of your project.

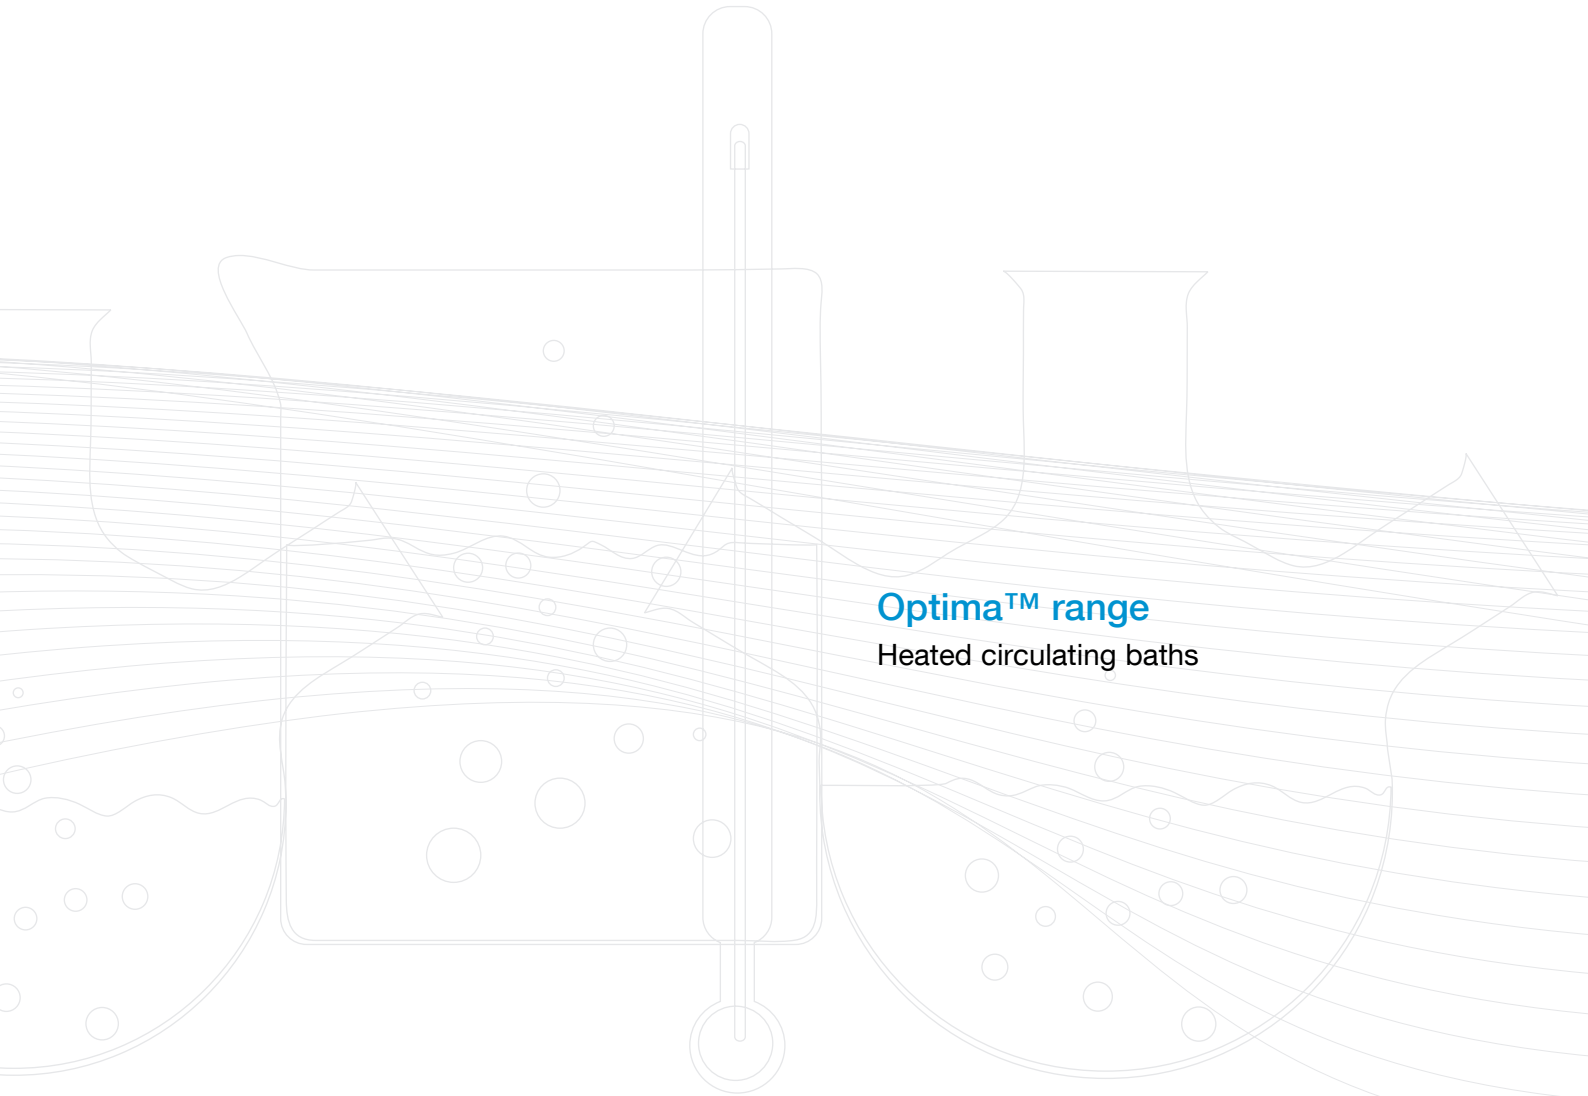
1 Heated circulating baths



Optima™ range

Heated circulating baths

Optima™ heated circulating baths and circulators

A cost-effective range of multi-purpose systems combining Grant's legendary quality and reliability. Precise temperature control for a wide range of laboratory applications.

- **Accurate and safe temperature control** – for samples and users
- **Intuitive programming and thoughtful design features** – makes working with Grant heated circulating baths and circulators easy
- **Robust, durable construction** – for longevity, reliability and long-term low cost of ownership
- **A complete range** – 32 models to cover basic through to sophisticated needs, each model represents excellent value for money

BUILT IN BRITAIN 3 year warranty

Model selection (operating temperature)

Any of the four Grant Optima™ heated circulators can be combined with any of eight Grant tanks (five stainless steel and three plastic) to provide a choice of 32 models. The colour-coded summary table on page 1.6 shows you the temperature range of each combination.

The following pages showcase examples of popular combinations for different requirements.

Liquids

We recommend the following liquids for use in Grant baths:

-50°C to 30°C:	Silicone oil - low viscosity (Bayer silicone M3)
-30°C to 30°C:	50% water, 50% antifreeze (inhibited ethylene glycol)
0°C to 30°C:	80% water, 20% antifreeze (inhibited ethylene glycol)
5°C to 99.9°C:	Water
70°C to 150°C:	Silicone fluid (viscosity ~20cS, flash point ≥230°C, fire point ≥280°C)
70°C to 200°C:	Silicone fluid (viscosity 50cS, flash point ≥285°C, fire point ≥340°C)

Optima™ Heated circulators

T100, TC120, TX150 and TXF200

The versatile Optima™ heating circulator range consists of 4 models - two general purpose: T100 and TC120 and two advanced models: TX150 and TXF200. Combine any of the four models with a Grant stainless steel or plastic tank or use independently with a clamp.

General purpose digital		Advanced digital	
T100: ambient +5 to 100ºC*	**TC120: ambient +5 to 120ºC***	**TX150: ambient +5 to 150ºC***	**TXF200: ambient +5 to 200ºC***
			

T100 / TC120		TX150 / TXF200	
Features	**Benefits**	**Features**	**Benefits**
Stability ±0.05°C.	Excellent temperature stability and temperature control for demanding applications.	Stability ±0.01°C.	Excellent temperature stability and temperature control for demanding applications.
Clear, bright 4 digit LED display.	Easy to view from a distance for instant reassurance of unit status.	Large, bright full colour display.	All key parameters visible on home screen for instant reassurance of unit status.
Simple, intuitive user interface: dial and two function buttons.	Easy and quick to set temperature and access menus. Minimal product training required.	Icon driven home screen via a dial and two function buttons.	Intuitive, quick and easy, language independent.
Integral pump for external circulation (TC120).	Circulation of temperature control fluids to external apparatus / equipment.	High performance integral pump for external circulation. TXF200 has variable speed.	Conveniently circulate temperature control fluids to external apparatus / equipment.
Model available with/without clamp (T-clamp).	Conveniently converts vessels into a stirred bath, offering excellent versatility.	Programming/temperature profiling (TX150, 1 program with 30 segments, TXF200 10 programs with 100 segments).	Easy and quick to configure temperature profiles to suit basic and advanced applications. Programming direct on TXF200.
Low-liquid detection (float switch).	Unit will cut-out when liquid level is too low for operation.	Model available with/without clamp (T-clamp).	Conveniently converts vessels into stirred bath, offering excellent versatility.
User adjustable over temperature dial (TC120).	Independent safety feature and sample protection.	Low-liquid detection (float switch).	Unit will cut-out when liquid level is too low for operation. Peace of mind that the unit will safely operate unattended.
Fixed over temperature (T100).	Independent safety feature.	5 point user calibration.	Calibrate the TX150/TXF200 at any 5 temperatures against a precision reference thermometer. Provides optimum accuracy at temperatures important to the user.
Visual alarm.	Alerts you when your attention is required.	User adjustable over temperature dial.	Independent safety feature and sample protection.
2 point user calibration.	Provides optimum accuracy at temperatures important to the user.	Display with a choice of 5 languages (EN, DE, FR, ES & IT).	-
Countdown timer (TC120).	Offers convenient reaction timing.	USB/RS232 interface.	Allows connection to PC or laptop for programming or data logging.

Applications:

- Clinical, microbiology and pathology labs - media tempering, thawing & incubating samples
- University research - temperature control of spectrophotometers, refractometers and jacketed vessels
- Industrial labs - temperature probe calibration, water analysis, QC testing product, petrochemical testing, material testing, milk sample testing

Showcase 1 – **mid range** example

Model TC120-ST12* range 0°C to 120°C**, stability ±0.05°C

Versatile mid-range model with digital thermostatic control unit and stainless steel tank and a comprehensive specification to suit most applications for precision temperature control.

- **Optima™ digital thermostat (TC120) for precise temperature control**
- **Cooling/heating range 0°C to 120°C****
- **Stability ±0.05°C**
- **Uniformity ±0.1°C**
- **Integral pump for external fluid circulation**
- **3 programmable temperature presets**
- **Easy to use rotary dial and two function keys**

BUILT IN BRITAIN 3 year warranty

TC120-ST12 model shown

Countdown timer with audible alarm – alerts you when your attention is required.

Simple-to-use rotary dial plus two function keys for quick temperature setting and menu navigation.

User calibration facility for optimum accuracy at the required operating temperature.

Powerful integral pump – allows temperature-controlled fluid to be circulated to external equipment (16L/min, 210mbar).

Dual-position bridge plate – ensures visibility/accessibility of the thermostat whilst optimising bench space.

Raised feet – for carrying / repositioning and retort stand access.

Liquid level protection and adjustable over temperature cut-out to protect the samples and the user.

Clear 4 digit display – easy to read from a distance for instant reassurance.

3 adjustable temperature presets for convenience.

Robust construction, corrosion resistant materials, stainless steel tank – durable in demanding environments.

Excellent temperature stability and uniformity ensured by stirred circulation in the bath.

Drain tap allows easy emptying.

Optional insulated gabled, removable hinged lid designed to improve energy efficiency and prevent evaporation.

* see summary table on page 1.6–1.7 for accessories and for other models utilising the TC120 heated circulator
** operation below ambient temperature requires optional accessory cooling

Applications:

- Clinical, microbiology and pathology labs - media tempering, thawing & incubating samples
- University research - temperature control of spectrophotometers, refractometers and jacketed vessels
- Industrial labs - temperature probe calibration, water analysis, QC testing product, petrochemical testing, material testing, milk sample testing

Showcase 2 – **high specification** example

Model TXF200-ST26* range -15°C to 200°C**, stability ±0.01°C

High specification model with high performance digital thermostat and stainless steel tank for sophisticated applications requiring complex programming and/or ultra precise temperature control.

- **Optima™ high performance digital thermostat (TXF200) for ultra precise temperature control**
- **Temperature range -15°C to 200°C****
- **Stability ±0.01°C**
- **Uniformity ±0.05°C**
- **Integral pump for external fluid circulation**
- **Full colour screen**
- **Easy to program via interface or remotely via PC / Laptop using Labwise™ software**
- **Key functions easily accessed via home screen icons**

BUILT IN BRITAIN 3 year warranty

Full colour screen – clearly displaying actual and set temperatures, pump speed and clear status icons.

Intuitive screen icons and menus – allow fast and accurate setup.

Socket for optional external probe – allows remote temperature control.

Five-point user calibration facility for optimum accuracy.

Countdown timer with audible alarm alerts when your attention is required.

Drain tap allows easy emptying

Raised feet – for carrying / repositioning and retort stand access.

Memory capacity for 10 programs containing 100 segments.

Program via intuitive user interface or connect to PC/ laptop to program via Labwise™ software.

The programming interface includes set target temperature - a choice of time to target temperature or temperature ramp speed. An additional programmable relay for on/off control of ancillary equipment.

High and low temperature alarm settings – visual, audible and programmable.

Powerful integral pump for external fluid circulation – variable speed, 22L/min, 530mbar.

Optional insulated gabled and removable hinged lid designed to improve energy efficiency and prevent evaporation.

Accessory cooling systems allow operation at or below ambient temperature. See page 1.9 for details.

* see summary table on page 1.6–1.7 for accessories and other models utilising the Grant high performance digital control units.
** operation below ambient temperature requires optional accessory cooling.

Applications:

- Industrial labs - thermostat calibration, haze analysis (brewing), temperature probe calibration and material testing
- University research - temperature control of external equipment such as spectrophotometers and refractometers. Circulation of temperature control fluid to jacketed vessels

Showcase 3 – **budget** example

Model T100-P12* range ambient +5°C to 99°C, stability ±0.05°C

Economy model with digital thermostatic control unit and plastic tank for straightforward applications requiring accurate temperature control.

- **Optima™ digital thermostat (T100) for accurate temperature control**
- **Temperature range ambient +5°C to 99°C**
- **Stability: ±0.05°C**
- **3 programmable temperature presets**
- **Low liquid protection and fixed over temperature cut-out**

BUILT IN BRITAIN 3 year warranty

Visual alarm – alerts you when your attention is required.

Simple-to-use rotory dial and two function keys for quick temperature setting and menu navigation.

Optional removable flat lid to minimise evaporation of fluid and avoid contamination of samples.

Choice of **120V and 230V models.**

User calibration facility for optimum accuracy at the required operating temperature.

Low liquid protection and fixed over temperature cut-out.

Operating setpoint plus **3 adjustable preset temperatures** for convenience.

Wide range of optional accessories for different applications, including test tube racks and raised shelves.

Robust plastic construction, double-walled for rigidity, easy to clean.

* see summary table on page 1.6-1.7 for accessories and for other models utilising T100 control units and/or plastic tanks.

Applications:

- Clinical, microbiology and pathology labs - media tempering, thawing & incubating samples
- Teaching labs, higher education/universities - practical demonstration/experimentation, sample preparation

Heating circulating baths - models, options and accessories

Any of the four Grant Optima™ digital thermostats can be combined with any of the Grant stainless steel and plastic tanks. The colour-coded summary table shows you the temperature range of each combination. For more details of Grant Optima™ heated circulator see, page 1.8.

***Note: Operation at or below ambient temperatures requires optional accessory cooling (page 1.7) or a refrigeration unit (section 2.1)**

Options and accessories

Labwise™ PC software (optional)				
Allows two-way communication for status display, programming and data capture (see page. 3.1 for more information) USB/RS232 cables provided.	-	-		
External probes (optional) for monitoring and controlling temperature of remote loads				
TXPEP flexible plastic probe, 3m cable	-	-	●	●
TXSEP stainless steel probe, 3m cable	-	-	●	●
Remote switching device (optional)				
For switching appliances on and off (up to max. 8 Amps)	-	-	1	1
Vertical turbine pumps (optional)*				
Low noise, compact design. Supplied with pipe connections and special lid for fitting to tank, pipe bore 12.7mm.		Required only where application demands a higher pressure than that delivered by the internal pump to maintain flow.		
VTP 1 Max. pressure 1000 mbar Max. flow 9 L/min				
VTP 2 Max. pressure 1650 mbar Max. flow 12 L/min				

* When pump is fitted, available working area is reduced ** maximum depth can be increased by 10mm, by removing the circulation tray in 18, 26 and 38 litre baths, with slight loss of performance.

Accessories

Lids*	Lids	Polypropylene	Rack systems†	Raised shelves	Optional Accessory cooling systems**		
To help reduce evaporation/ heat loss and avoid sample contamination	For continuous use with water above 90°C. Stainless steel.	spheres* 300 spheres in one pack (no. of packs required)	To optimise use of available bath capacity (no. of racks accommodated)	To allow shallow vessels to be accommodated	To allow systems to operate at or below ambient temperature by means of a cooling coil dipped into the bath; designed for minimal impact on working area.		
					Refrigerated immersion coolers Consist of a cooling coil connected to a refrigeration unit by a flexible pipe. Extract heat continuously, with the bath control unit controlling temperature. 		**Heat exchange coil** Designed to be attached to a supply of cooling tap water or a refrigerated circulator.
					C1G (0°C to 40°C***)	**C2G** (-15°C to 40°C***)	**CW5** (2°C above coolant temperature)

STL26  gabled, hinged (removable) stainless steel	**LST26** 	**2 x PS20** 	**4 x VR** 	**RS28**  (h 45 or 135mm)			
STL38  gabled, hinged (removable) stainless steel	**LST38** 	**3 x PS20** 	**6 x VR** 	**RS28** or **RS38**  (h 45 or 135mm)			
PL5  flat, stainless steel	–	**1 x PS20** 	**1 x QR** 	–	–	–	–
PL12  curved plastic	–	**1 x PS20** 	**2 x VR** 	**RS14**  (h 40 or 78mm)	–	–	–
PL18  curved plastic	–	**2 x PS20** 	**4 x VR** 	**RS22**  (h 40 or 78mm)	–	–	–

* Between operating temperatures 60°C and 100°C and below room temperature a lid or layers of polypropylene spheres should be used.

** The cooling coil can be continuously immersed in liquids up to 100°C with the cooler switched off, and may be used to cool liquid down from 100°C, but it is not designed for continuous operation above 40°C.

*** Minimum operating temperature without accessory cooling is ambient +5°C (amb.+ 15°C for P5 and ST5 tanks).

Grant Optima™ heated circulators

Maximum pressure	water	mbar	-	210	310	530
Maximum flow	water	L/min	-	16	18	22 (adjustable flow rate)
Pump connector	6mm bore*		-	fits 9 mm inner diameter tubing		
Pump connector	11mm bore*		-	fits 15 mm inner diameter tubing		

* 6 and 11 mm bore pump connectors supplied as standard. For more options see page 1.9.

Grant heated circulators are suitable for use with Grant stainless steel and plastic tanks. With the addition of a clamp (T-Clamp) they can also be attached to virtually any vertical sided tank with a maximum wall thickness of 35mm for rectangular tanks, 30mm for circular tanks (300 mm diameter), and a capacity of up to 50 litres. Minimum and maximum temperatures achievable are dependent upon the tank insulation and minimum operating temperature depends on the accessory cooling device.

High pressure pumps (optional)

			VTP pumps	
			VTP1	VTP2
				
Maximum pressure	water	mbar	1000	1650
Maximum flow	water	L/min	9	12
Pipe bore	inlet/outlet	mm	12.7	12.7
Electrical connection			10 amp IEC	10 amp IEC
Power consumption		W	30	40
Power output to liquid @ 20°C		W	15*	22*
Safety			thermal fuse	thermal fuse

*The VTP optional pumps will transfer additional heat to the baths, so the minimum temperature achievable with or without accessory cooling will be increased.
Note: When ordering a VTP pump, please specify which Grant tank it is to be used with.

RC series

Recirculating chillers

Refrigerated/heated circulating baths and circulator range

Cost-effective and efficient multi-purpose systems for cooling applications.

- **NEW!** innovative energy efficient models.
- **Powerful precision cooling** whether used in open-loop or closed-loop format.
- **Combining legendary quality, reliability and design for everyday usage** - useful features, straightforward maintenance, compact design.
- **Robust, durable construction** for longevity, reliability and long-term low cost of ownership.
- **A comprehensive range** - 11 models to cover basic through to sophisticated needs.
- **Industry leading up to** 4 years warranty.

Operating temperature

The LT ecocool™ refrigeration range offers accurate temperature control from -30°C to 200°C and is available in three models (LT ecocool™ 200 available 2016).

The R4 and R5 refrigeration range consist of two refrigeration units which can be combined with any of Grant's Optima™ heated circulators to offer a temperature range of -47°C to 100°C.

Liquids

We recommend the following liquids for use in Grant baths:

-50°C to 30°C:	Silicone oil - low viscosity (Bayer silicone M3)
-30°C to 30°C:	50% water, 50% antifreeze (inhibited ethylene glycol)
0°C to 30°C:	80% water, 20% antifreeze (inhibited ethylene glycol)
5°C to 99.9°C:	Water
70°C to 150°C:	Silicone fluid (viscosity ~20cS, flash point ≥230°C, fire point ≥280°C)
70°C to 200°C:	Silicone fluid (viscosity 50cS, flash point ≥285°C, fire point ≥340°C)

Always read the manual and warnings when choosing a fluid.

Factors to consider when choosing your system

- **Do you need to immerse samples within a tank?**

Consider the working area required. The table on page. 2.4 shows the dimensions of the top opening and the min/max liquid depths.

- **Cooling power required at a given temperature**

For example, if your operating temperature is 0°C and you need 500W cooling power, you will need the R4 or R5 refrigeration unit with any of the controllers. Alternatively to calculate the power required use the following formula:

$$W = \frac{V \times T \times K}{60 \times t \text{ (mins)}}$$

W = average cooling power	Water	K = 4200
V = total system liquid volume L	50/50 water/glycol	K = 3800
T = temperature difference °C	Alcohol	K = 2100
K = liquid heat capacity (J/L/°C)	Silicone oil	K = 1800

- **Cool-down time required to reach that temperature**

Calculate the cool-down time required according to the following formula, and refer to the cool down curves for individual performance.

$$t \text{ (mins)} = \frac{V \times T \times K}{60 \times W}$$

- **Do you need to control the temperature of/remove the heat from an external device?**

1. Consider the pump requirement. Liquid flow rate is critical in order to maintain adequate exchange of heat within the external system. Flow rate is dependent on the restrictions within the system. Factors which cause a pressure drop are height, length, pipe bore and the number and angle of bends within the system. To maintain sufficient flow in a highly restricted system, a high pressure pump is required. The integral pumps in the Optima™ and LT ecocool™ series thermostats are satisfactory for most laboratory applications; for more powerful pump requirements select either of the Grant accessory vertical turbine pumps (VTP).

2. Consider whether you need to control the temperature within the external apparatus. For external temperature control choose the TX150, TXF200 or LT ecocool™ 150/200 controllers and an external temperature probe.

- **Do you require temperature ramping?**

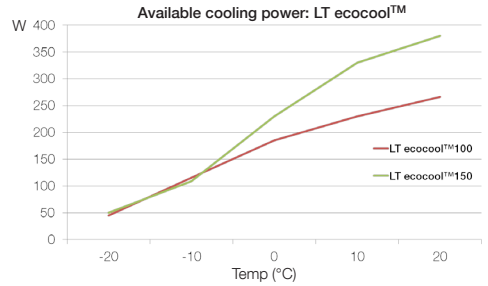
If yes, choose the TX150, TXF200 or LT ecocool™ controller and Labwise™ accessory software. For refrigeration on/off control by programmable relay choose refrigeration units R4 or R5.

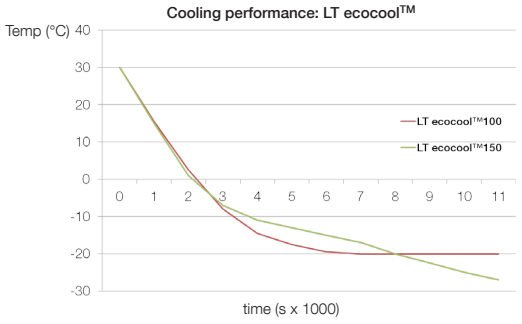
- **What other features do you require?**

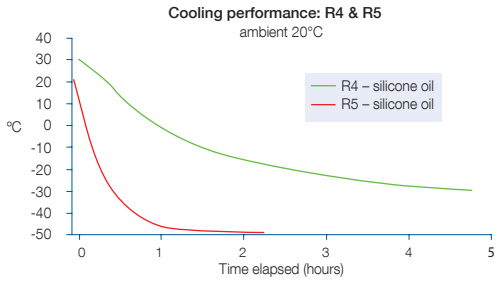
Consider the numerous features offered by the four Optima™ series or LT ecocool™ 150/200 controllers, and select the controller that meets your needs.

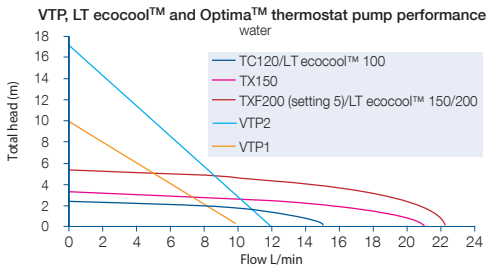
- **Help**

If you need help choosing the correct system please contact **salesdesk@grantinstruments.com** or call **+44 (0) 1763 264 741**.









LT ecocool energy efficient Refrigerated/heated circulating baths

A new range of innovative, eco-friendly, refrigerated heated circulating baths offering significant running cost savings whilst delivering powerful cooling. Consisting of two models, the LT ecocool range is supplied assembled as ready to use kits, complete with accessory hosing*, clips and connectors as standard.

- **Choice of two models, temperature range -25°C to 150°C+ (model dependent)**
- **Industry leading 4 year warranty with Grant renowned service and support, no registration required**
- **Active cooling through the whole temperature range**
- **True energy saving of up to 80% against standard compressor units**

BUILT IN BRITAIN | 4 year warranty

* Temperature range of hosing supplied: -40ºC to 100°C (can be cut to length as required). Supplied tubing 2 x 1.5m ID 9mm Ø

eco mode optimises the cooling control needed, enabling rapid cool down when required.

True energy saving against competitor units that only switch the compressor on or off.

Intuitive user interface

No-spill valved front drain.

Built in Britain to the highest specifications, 5 day dispatch, 4 year industry leading warranty.

Full colour 5 language QVGA TFT display on both the LT ecocool™ 150 and LT ecocool™ 200 units.

Modern, sleek, attractive design

Thermostat and chiller work in harmony, neither will operate alone, eliminating any danger of overheating or freezing.

Single front switch for user convenience.

No side vents, locate to suit the user, not the unit.

Applications:

- Pharmaceutical - mini pilot plant reactors
- Education - rotary evaporator cooling, replacement of running tap water cooling, immersing small samples, photometry, chromatography systems
- Industrial - QC testing, sample preparation, general cooling, reaction chemistry, temperature control, semi-conductor manufacturing, rheometry
- Food - refractometry
- Life-science - electrophoresis cooling
- High temperature cooling - active up to 150°C

Optima™ refrigerated baths and circulator range

A collection of high performance refrigeration units which can be combined with any of 4 Optima™ heated circulators to deliver outstanding temperature performance for routine and sophisticated applications requiring accurate temperature control in the range of -47°C to 100°C. Grant also offer the LTC4 (TX150-R4) which is available as a kit with the heated circulator, refrigeration unit and insulated tubing* to form a ready to use system.

- **Choice of two base refrigeration units and four heated circulators, temperature range -47°C to 100°C (model dependent)**
- **Stability of up to ±0.01°C**
- **3 years warranty, 4 years with the LTC4**
- **No spill valved front drain**
- **Safe - water freeze protection thermostat and 27 bar high pressure switch**
- **3 preset programs**

	High temperature hose kit, includes 2 x 2m high temperature insulated hosing -50 to 200˚C, assembled with LT ecocool™/Optima™ pump outlet plate and simple hose clips, no tools required. Can be cut to length. 8mm ID, 11mm OD.	**HOSE200**

Recirculating chillers

RC series

Comprehensive range of robust recirculating chillers delivering a constant flow of temperature-controlled liquid to provide powerful, regulated cooling at -10ºC for many types of industrial machinery and scientific apparatus. Suitable for circulation through open and closed systems.

- **Temperature range -10ºC to 60ºC (model dependent)**
- **Stability ±0.25ºC or ±0.5ºC (model dependent)**
- **Choice of models with different cooling power – from 350 to 3000W**
- **Efficient, reliable and cost-effective alternative to cooling with mains water**

BUILT IN BRITAIN 3 year warranty

RC350G recirculating chiller

Choice of four models – three acting as recirculating chillers/heaters, one as a powerful dedicated recirculating chiller (**RC3000G**).

Digital controller for accurate and reproducible temperature setting. User-selectable high and low temperature alarms.

Robust construction, using corrosion resistant materials – long term durability and reliability in demanding applications.

Inbuilt safety features protect the user, equipment and application from over temperature, under temperature and flow failure.

A useful TUNE facility enables automatic optimisation of the chiller's closed-loop temperature control parameters to meet specific user requirements.

Lockable wheels allow RC units to be moved easily from location to location and ensure that they stay put once in position.

Applications:

- Electronics - cooling system for etch baths, glass coating for top-up display in aircrafts
- Industry - print head cooling for textile industry, calibration system probe
- Academia - physics and astronomy lab equipment cooling, sea water cooling for producing ikatite minerals
- Research - seed research, cooling of scientific X-ray analytical units, SEM cooling

Products for special low temperature applications – Technical specifications

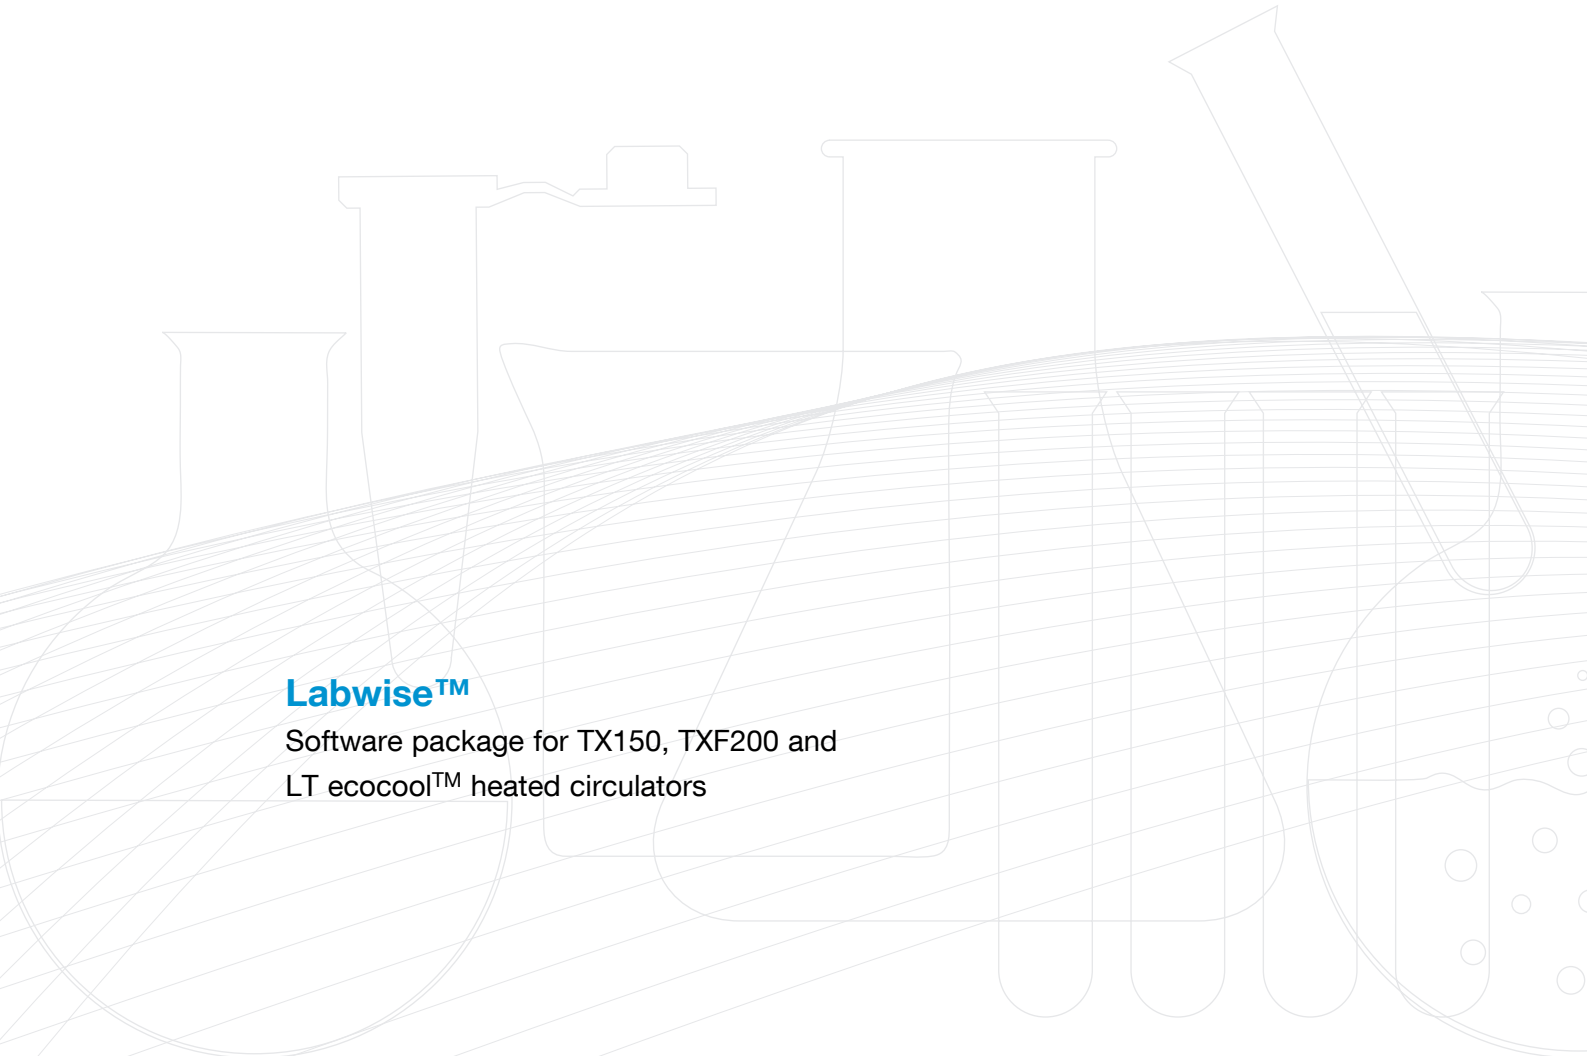
Accessories for RC series

- **RC BYP** – bypass to overcome flow restrictions (flow < 1 L/min), e.g. in narrow tubes or small cells.
- **RC PR** – pressure gauge to assist with setting up cooling systems and monitoring performance.
- **PRES** – priming reservoir to simplify priming in a closed loop system which has no filling port available on the RC inlet (not required for RC3000G).
- **External probe** – for remote sensing temperature control. On request only. Specify when ordering, requires modification to chiller.
- **RC HF9, RC HF12, RC HF17** – Rear connecting fittings (pair) for 9, 12 and 17 mm internal diameter hose sizes respectively.

3 Control and analysis software for heated circulators



Labwise™

Software package for TX150, TXF200 and LT ecocool™ heated circulators

Labwise™ control and analysis software for the laboratory

Labwise™ is a powerful and convenient software package for programming, controlling and recording key parameters of high performance baths and circulators in the Grant Optima™ range via a PC.

- **Full control of set-up, multi-segment programming and data logging for heating and cooling**
- **Real-time status windows with graphic display including zooming and scaling**
- **Operates in combination with Grant Optima™ TX150, TXF200 and LT ecocool™ series baths and circulators**
- **Enables easy control of relays and remote switching devices, including multiple segments**

Labwise™ set-up features

- set temperature
- set high and low alarms; alarms can be configured to switch a relay
- set reaction timer
- set delayed start and stop time
- control of output relays for refrigeration on/off control and operating ancillary equipment
- control of pump speed for TXF200

Labwise™ programming features

- set cool or heat time to target
- program values may be set graphically or numerically
- up to 100 segments per program (TXF200)
- set number of loops, 1 to 254 or infinite looping between selected way points
- programmed control of output relays for each segment, for operating ancillary equipment
- control of pump speed for TXF200

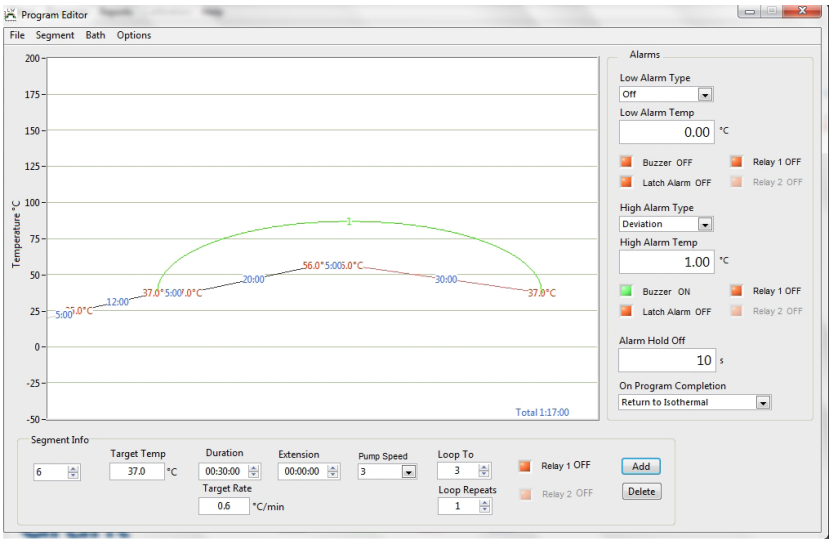
Labwise™ display and logging features

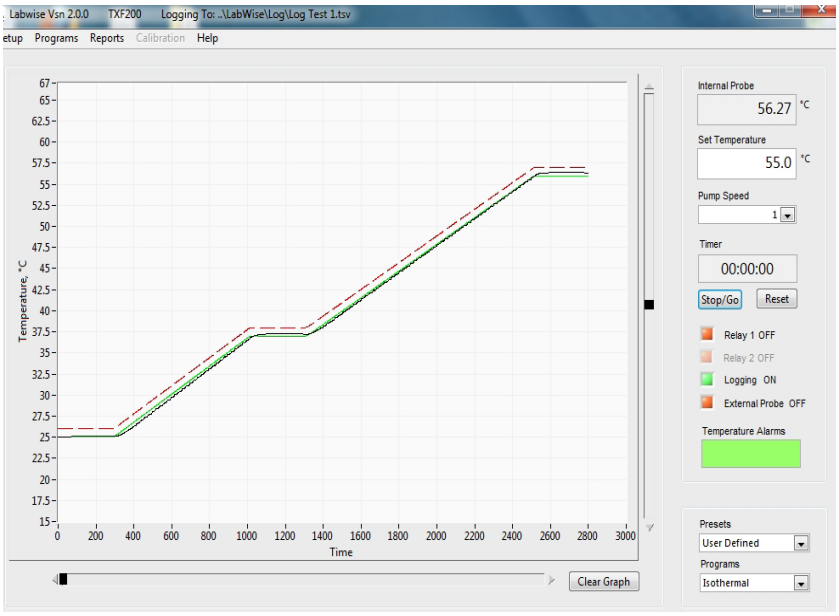
- display of temperature/time profile on screen in real time
- real time zoom and scaling of graphical display
- logging of temperature profiles to disk for storage and subsequent analysis
- store programs to disk

Remote switching device

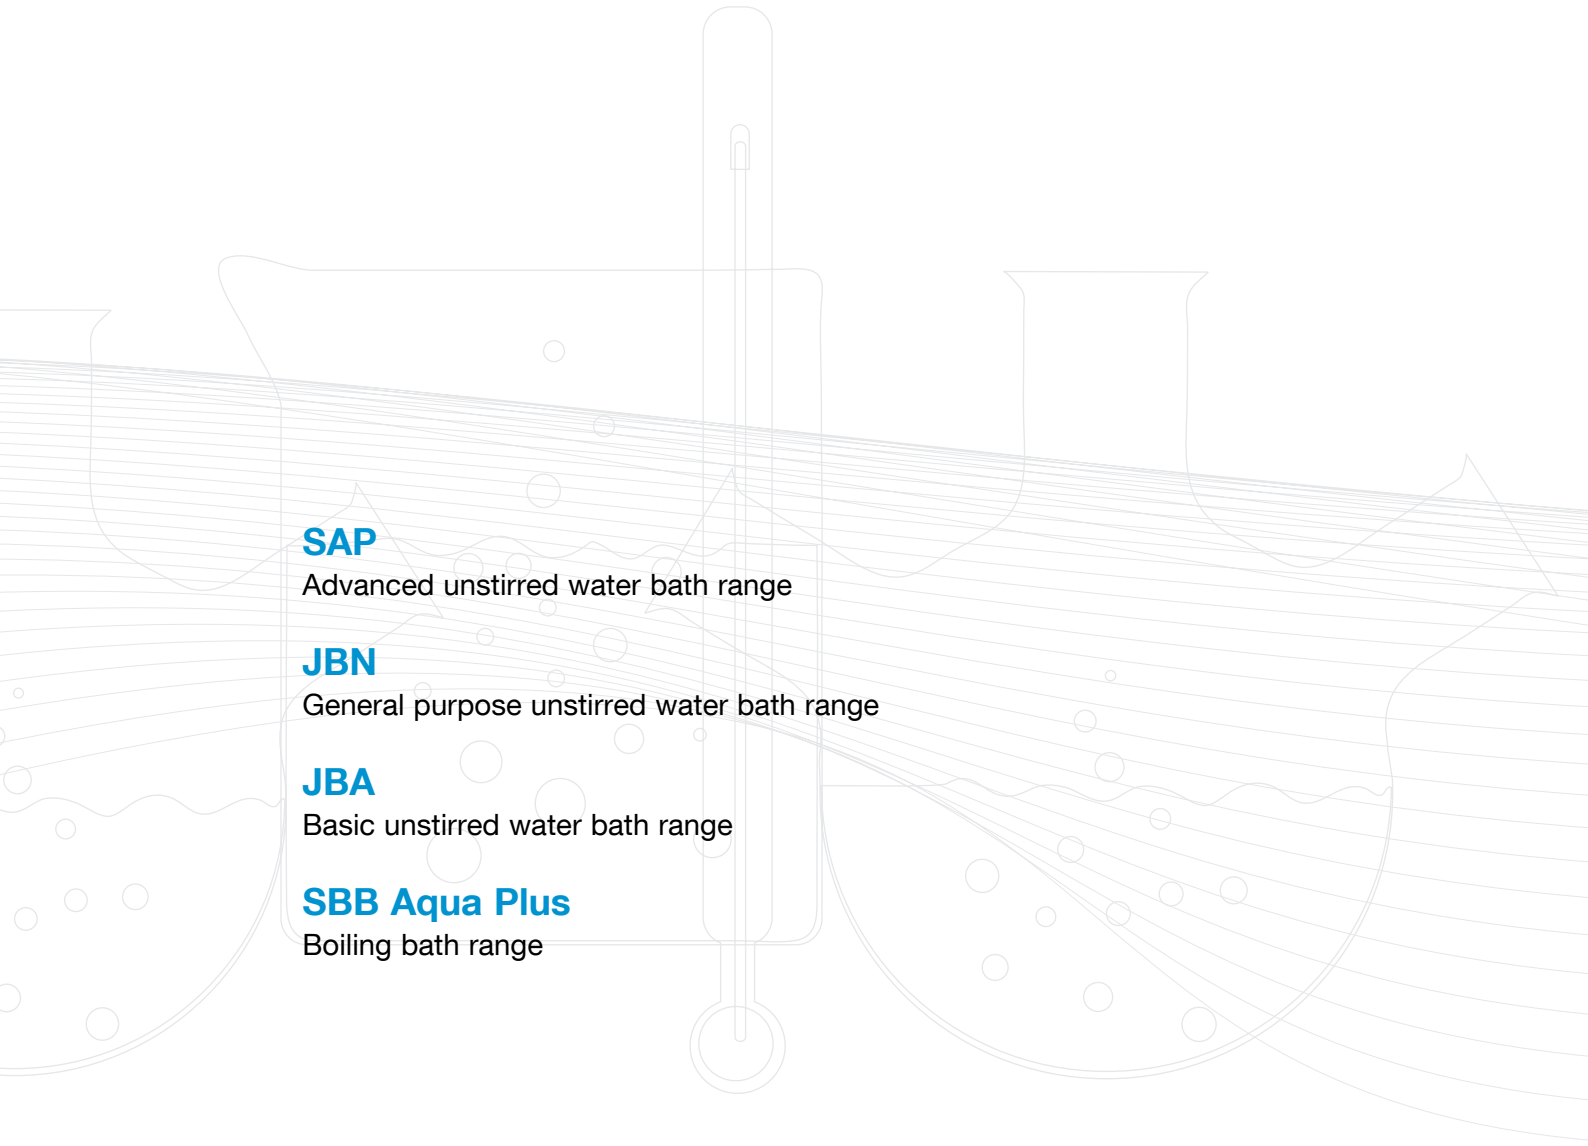
When used in combination with a remote switching device (RSD), the TX150 and TXF200 heated circulator can control, by switching on and off, any mains powered appliance (up to a maximum of 8 Amps).

This function can be programmed with Labwise™ software or alternatively directly on the TXF200 heated circulator.





4 Unstirred water baths



SAP
Advanced unstirred water bath range

JBN
General purpose unstirred water bath range

JBA
Basic unstirred water bath range

SBB Aqua Plus
Boiling bath range

Liquids
We recommend the following liquids for use in Grant baths:

5°C to 99°C: Water

Unstirred water baths

The reliability, quality and consistent performance of Grant products have made Grant a leading manufacturer of water baths for decades.

- **A new era for Grant water baths** – now all models from basic through to advanced have digital controls.
- **Proven performance** – technology to deliver temperature control you can rely on.
- **Set and Forget™ technology** - fast heat up, accurate temperature control.

BUILT IN BRITAIN 3 year warranty

SAP range - advanced water bath range with a choice of 8 models. Supplied with base tray, lid and drain on larger baths.

JBN range - general purpose water bath range with a choice of 4 models. Supplied with base tray, lid and drain on larger baths.

JBA range - basic range with a choice of 3 models. Supplied with base tray.

SBB Aqua Plus boiling bath range – choice of four models. Supplied with polycarbonate lid and stainless steel base tray.

Advanced digital unstirred water bath range - SUB Aqua Pro

Built to the highest standard and specifications, and incorporating the latest technology the SUB Aqua Pro advanced water bath range supports even the most demanding applications requiring accurate temperature control. Choose from eight models with base tray and lid included as standard.

- **Ambient +5°C to 99°C operation**
- **Unique Set and Forget™ technology - fast heat-up, accurate temperature control**
- **Stability ±0.2°C**
- **Adjustable over temperature alarm - protect samples from over heating**
- **Advanced dry start and run dry protection**
- **Suitable for use with heat transfer beads. (excluding SAP2 & SAP2S)**
- **3 year warranty**

BUILT IN BRITAIN 3 year warranty

SAP12 model shown

Grant non-drip clear lid, included as standard – improves performance, limits evaporation and conserves energy.

Clear, wide-angle viewing LED display - instant reassurance of bath status.

Front panel lock disables front panel controls preventing unintentional temperature changes.

Advanced dry run and run dry protection - prevents costly service repairs in case bath is switched on or run without water. Simply fill and restart.

User settable over-temperature alarm – provides sample protection. Alerts the user and cuts off heating at user defined temperature.

Drain tap – allows convenient emptying on 12L, 18L, 26L, 34L, dual 5&12L baths.

Fixed thermal cut-out - independent safety cut-out.

Countdown timer (1-999 mins) with audible buzzer – for accurate reaction timing.

Heater mat and sensor bonded to underside of tank – optimised uniformity and work space. Tank easy to clean.

Three programmable temperature presets – allows commonly used temperatures to be quickly selected.

User calibration – single or dual-point for optimum accuracy at your working temperatures.

Markets:
- Pharma/biotech, education, industry, healthcare

Applications:
- Sample preparation, sample incubation, sample warming, sample thawing, media preparation, QC materials, practical science demonstration

General purpose digital water bath range – JB Nova

General purpose water baths with stable temperature control, simple interface and fast heat-up. A choice of four models with a base tray and lid included as standard.

- **Ambient +5°C to 95°C operation**
- **Unique Set and Forget™ technology - fast heat up, reliable temperature control**
- **Stability: ±0.5°C**
- **Simple, intuitive controls - quick and easy to set temperature**
- **Drain tap on 12L, 18L and 26L baths**
- **Practical front panel lock - disables front panel controls preventing unintentional temperatures changes**
- **3 year warranty**
- **Suitable for use with heat transfer beads**

BUILT IN BRITAIN 3 year warranty

JBN12 model shown

Grant non-drip clear lid, included as standard – improves performance, limits evaporation and conserves energy.

Base tray (included as standard) – promotes heat convection and optimal temperature uniformity, also allows any container to be placed directly in the bath.

Front panel lock disables front panel controls preventing unintentional temperature changes.

Clear, wide-angle viewing LED display - instant reassurance of bath status.

Advanced dry run and run dry protection - prevents costly service repairs in case bath is accidentally switched on or run without water. Simply fill and restart.

Fixed thermal cut-out - independent safety cut-out.

User-calibration – single point for optimum accuracy at your working temperatures.

Simple and intuitive controls for quick temperature setting – immediate temperature re-setting using ▾ and ▴ buttons.

Drain tap – allows convenient emptying on 12L, 18L and 26L baths.

Heater mat and sensor bonded to underside of tank – optimised uniformity and work space. Tank easy to clean.

Markets:

Boiling baths – SBB Aqua Plus series

The SBB Aqua Plus boiling baths are robust, reliable and provide continuous 100°C operation. The range consists of four models to suit a range of applications and any budget.

- **Adjustable energy regulator provides steady boiling**
- **Constant level device maintains liquid level**
- **Robust and reliable design to withstand everyday wear and tear**
- **Choice of sizes to suit individual applications**
- **Non-drip polycarbonate lid included as standard**
- **3 year warranty**

BUILT IN BRITAIN 3 year warranty

SBB Aqua 12 Plus model shown

Grant non-drip polycarbonate lid included – improves performance, limits evaporation and conserves energy.

Large available working area in relation to footprint.

Stainless steel tank in a robust outer case – tough and durable in demanding environments.

Adjustable energy regulator provides steady boiling.

Range of tank sizes and options to suit different requirements.

Constant level device ensures the bath doesn't boil dry, protecting the unit and the samples.

Two over temperature cut-outs protect users and the workplace if bath is accidentally run without liquid.

Supplied with perforated tray to ensure uniform heat distribution.

Applications:

- Clinical, microbiology and pathology labs - media preparation
- University research/teaching - tissue culture preparation, warming tissue culture media
- Industrial laboratories - equipment sanitisation, sample preparation for immuno assays
- Science education in schools/universities - practical science demonstration and experimentation

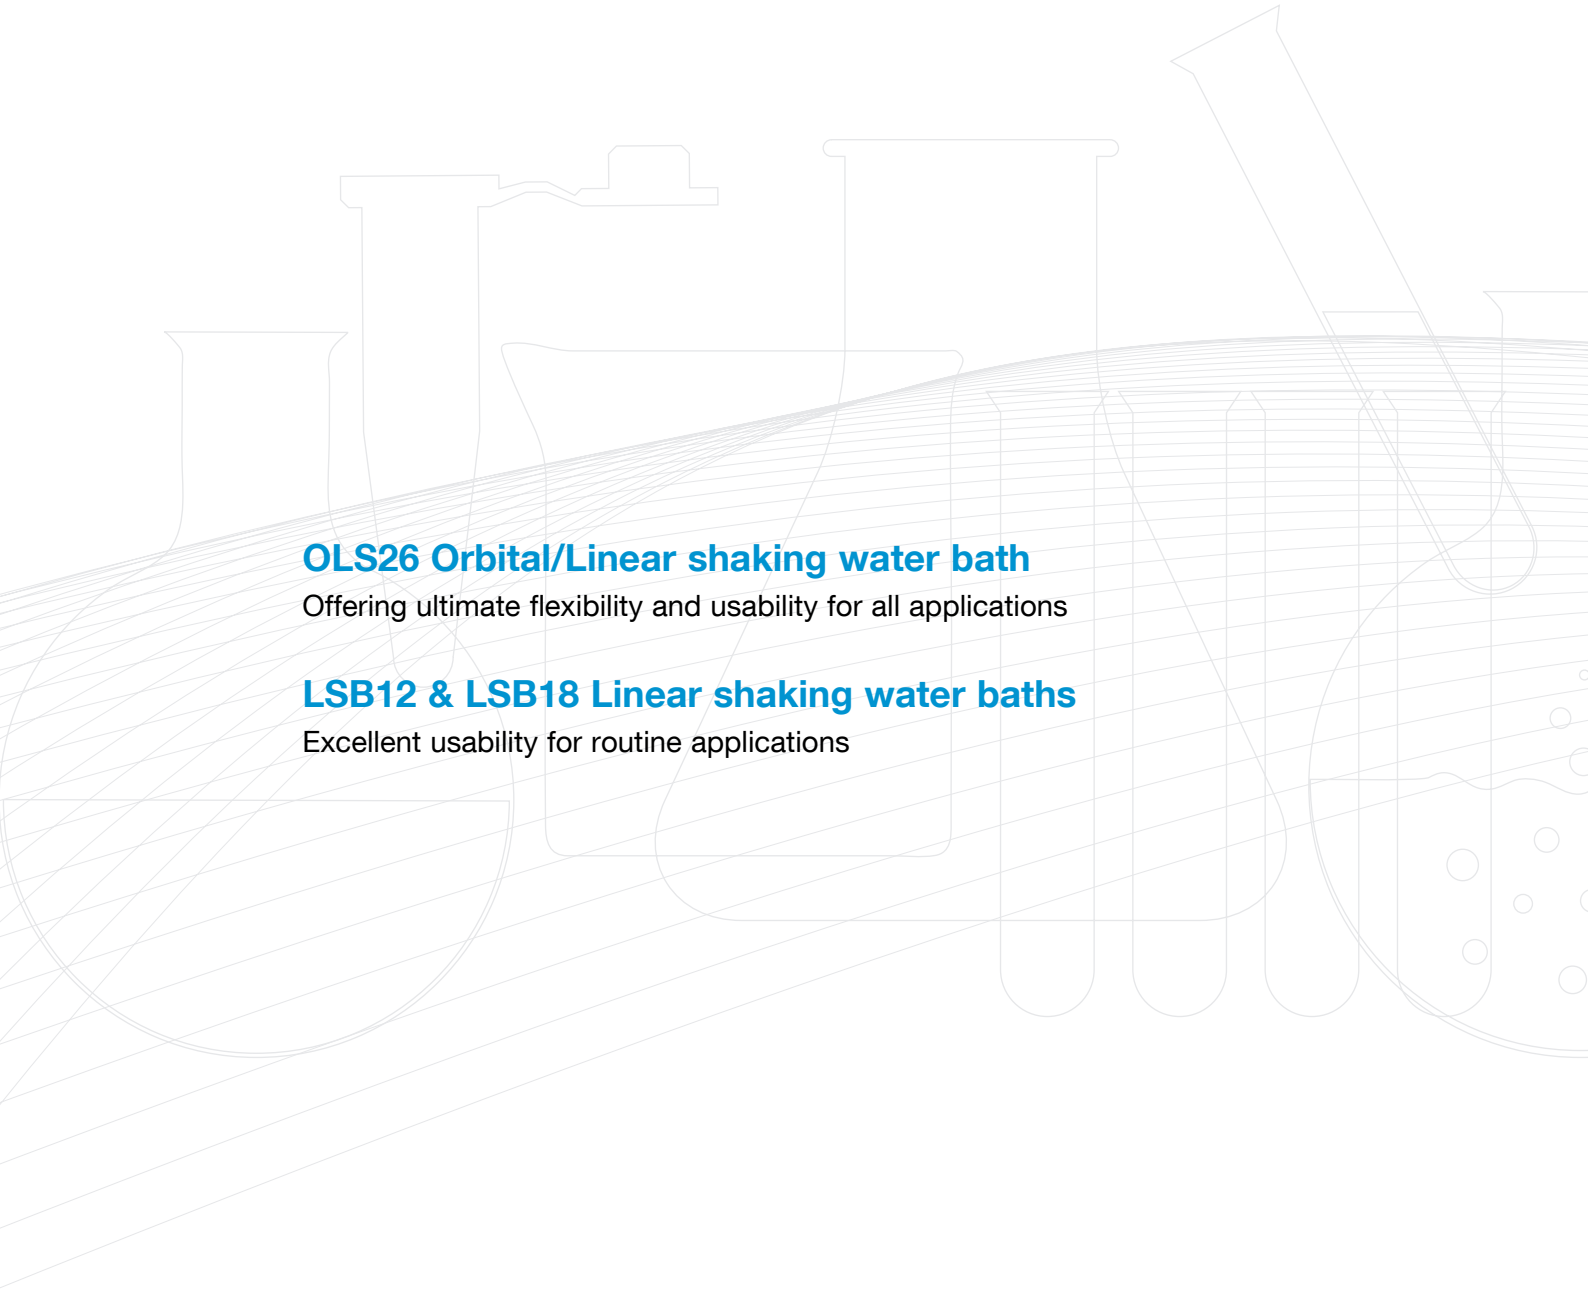
5 Shaking water baths



OLS26 Orbital/Linear shaking water bath

Offering ultimate flexibility and usability for all applications

LSB12 & LSB18 Linear shaking water baths

Excellent usability for routine applications

Shaking water baths

World-renowned shaking water baths from Grant; high precision temperature control combined with a robust, high quality, patented orbital and linear shaking mechanism that works smoothly and consistently even in demanding applications. Universal tray included as standard.

- **High quality, robust design with unique magnetically coupled shaking mechanism** for maximum reliability, consistency and quiet operation.
- **Flexible choice of combined orbital/linear shaking or linear only shaking** for all routine and demanding techniques.
- **Extensive range of accessories** to provide the right solution for your application. Varied vessel types can be securely held using high quality, springs, clamps or racks

BUILT IN BRITAIN

3 year warranty

Combined orbital/linear shaking water bath OLS26
For ultimate flexibility and usability

LSB12 and LSB18
Excellent usablilty for all routine applications

Liquids

We recommend the following liquids for use in Grant shaking water baths:

5°C to 99°C: Water

Combined orbital/linear shaking water bath

Model OLS26 Amb +5°C to 99°C. Extend lower range to 0°C using optional accessory cooling.

Patented, combined orbital and linear shaking mechanism of the OLS26 allows optimisation of aeration and shear forces mixing, for reproducible results.

- **Precision digital temperature control**
- **0°C to 99°C operating range***
- **Stability ±0.1°C**
- **Easy changeover from linear to orbital shaking**
- **Adjustable shaking speed and stroke length**
- **Universal tray and polycarbonate lid included as standard**
- **Drain tap for convenient emptying**
- **3 year warranty**

BUILT IN BRITAIN 3 year warranty

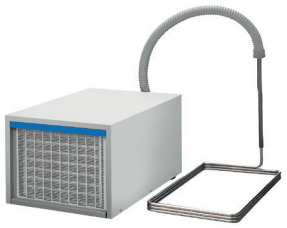
OLS26 model shown

Universal tray included as standard - additional accessory trays include:
Flask tray - mix and match flask clamps.
Test tube / microtube tray
See page 5.3 for full list of trays

Universal tray flask capacity: 3 x 1000ml, 6 x 500ml, 18 x 100ml, 28 x 50ml, 45 x 25ml.

Powerful drive mechanism - soft start, quiet operation for smooth shaking over a wide speed range.

Can be operated below ambient to 0°C with accessory cooling - CC26.



Heater and temperature sensor mounted under tank - large available working area; easy to clean and keep clean.

User defined high-temp alarm and cut-out - provides sample protection.

Countdown timer with audible alarm - for accurate reaction timing (1-999 mins).

Unique shaking mechanism allows orbital and linear shaking in one product - simply rotate the tray carrier 180° to change between modes.

Grant non-drip polycarbonate lid included as standard - improves performance, limits evaporation and conserves energy.

Front panel lock - disables front panel controls preventing settings being accidentally changed.

User calibration - single or dual for optimum accuracy at your working tempeature.

Digital PID temperature control circuitry – with sensitive Pt1000 temperature control probe.

Conveniently located drain tap for easy emptying.

Individual displays / controls for temperature and shaking speed.

Two adjustable temperature and shaking speed presets.

* accessory cooling required for operation below ambient

Applications:

- General use - defrosting, cooling/warming liquids, temperature control of samples
- Life-science - microbiological assays, tissue studies, cell cultivation fermentation, bacterial culture, biochemical assays, enzyme assay
- Industrial - materials testing, corrosion testing
- Biopharm - solubility testing of medical coatings, dissolution, cooling crystallisation
- Food & beverage - extractions, food digestion

Linear shaking water bath – LSB Aqua Pro range

Grant quality and design combined with the temperature stability and functions you need in a linear shaking bath for your laboratory.

- **Ambient +5°C to 99°C operation**
- **Stability ±0.1°C**
- **Choice of two models – 12 and 18 litre**
- **Drain tap for convenient emptying**
- **3 year warranty**
- **Universal tray and polycarbonate lid included**
- **Extensive choice of accessory shaking trays**

BUILT IN BRITAIN 3 year warranty

LSB12 model shown

Stainless steel tank – high grade steel, with durable polished finish.

Robust magnetically coupled shaking mechanism – safe, reliable, durable, space saving.

User settable over temperature alarm – provides sample protection. Alerts user and cuts off heating at user defined temperature.

Drain tap – allows convenient emptying

Heater mat and sensor bonded to underside of tank – optimises temperature uniformity, workspace and is easy to clean.

Two programmable temperature and shaking presets – allows commonly used temperatures and shaking speeds to be quickly selected.

Grant non-drip polycarbonate lid included as standard – improves performance, limits evaporation and conserves energy.

Unique shaking mechanism - soft start, quiet operation for smooth shaking over a wide speed range.

Digital PID temperature control circuitry – with sensitive Pt1000 temperature control probe.

Clear, wide-angle viewing LED display.

Universal tray included as standard - additional accessory trays include:
Flask tray - mix and match flask clamps.
Test tube / microtube tray
See page 5.5 for full list of trays

Countdown timer with audible alarm – for accurate reaction timing (1-999mins).

User-calibration – single or dual-point for optimum accuracy at your working temperature.

Front panel lock – disables front panel controls preventing settings being accidentally changed.

Applications:

- Clinical/healthcare - thawing/mixing samples
- Pharmaceutical - heating and mixing samples
- Science education in schools/universities - practical science demonstration and experimentation
- Industrial - QC testing, sample preparation

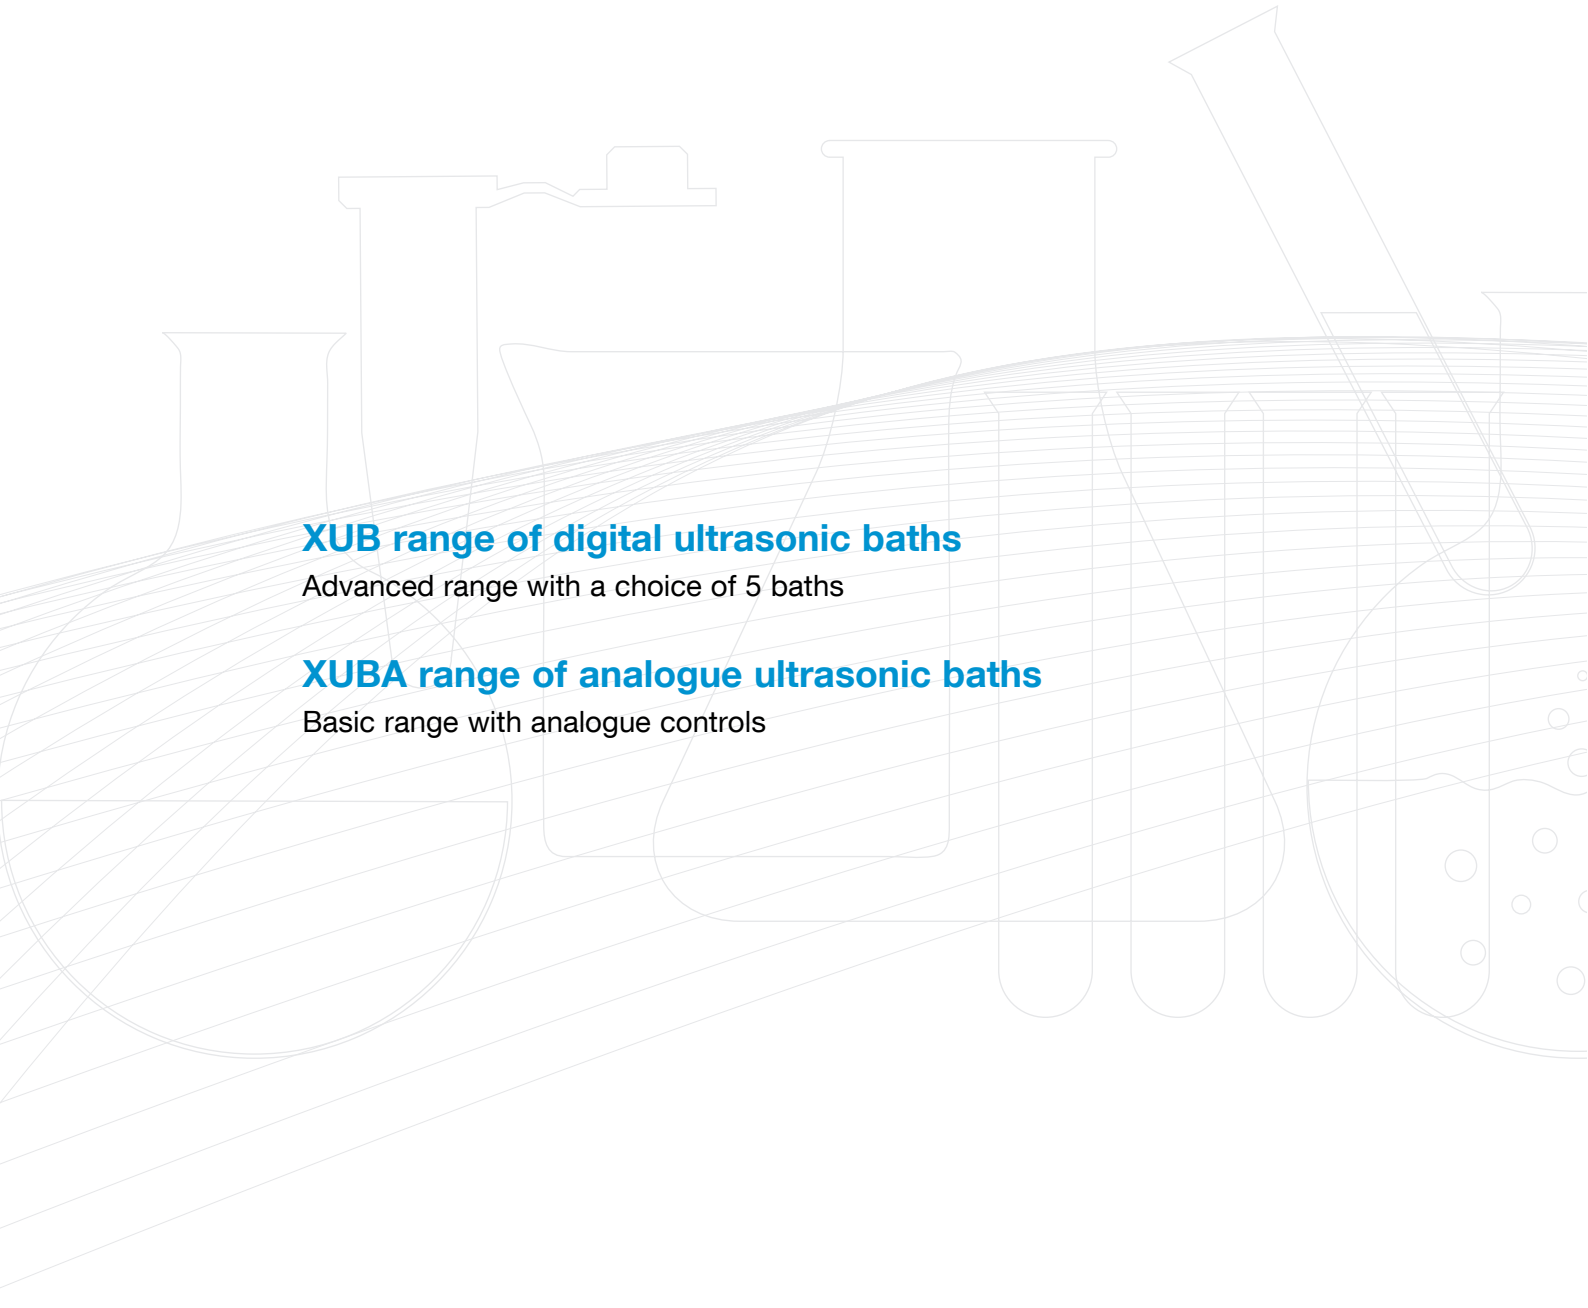
6 Ultrasonic baths



XUB range of digital ultrasonic baths

Advanced range with a choice of 5 baths

XUBA range of analogue ultrasonic baths

Basic range with analogue controls

Ultrasonic baths

The XUBA and XUB series of reliable, high-performance ultrasonic baths offer fast, safe and cost-effective consistent ultrasonics for various scientific and laboratory applications.

- Proven transducer technology provides outstanding performance and reliability
- Gentle yet effective cleaning ensuring consistent results for rapid and complete removal of contaminants
- Suitable for sophisticated applications in the scientific sector such as degassing, sonochemistry and fluid dissolution
- Clean finish, high-quality and robust design for long-term reliability and durability.
- A choice of five digital and two analogue models (XUBA's available in 230V versions only)

The XUB and XUBA range of baths are ideal for cleaning a wide range of laboratory instruments as well as in other healthcare, medical and industrial applications. The ultrasonic activity generated in the baths allows rapid and effective cleaning and processing of a wide range of instruments and components – a safer alternative to manual operations.

XUB digital ultrasonic baths

The XUB range of digitally controlled benchtop ultrasonic baths offer consistent and reliable performance in a variety of environments. Incorporating Frequency LEAP technology to ensure uniform levels of ultrasonic activity throughout the fluid, these baths offer high performance giving an accurate and precise ultrasonic process.

- **Frequency LEAP technology provides more homogeneous ultrasonic activity throughout the tank, reducing dead spots and standing waves**
- **Heated from ambient +5˚C to 70˚C**
- **Accurate process control of time, temperature, ultrasonic activity, degas and power**
- **Modern, sleek design with stainless steel basket, ABS plastic lid, M2 ultrasonic cleaning solution, SD card and drain tap included as standard**
- **Degassing function to remove small bubbles from liquid, reducing the overall time needed for ultrasonic operation**
- **A choice of 5 sizes**
- **Adjustable power that can be reduced from 100 to 50% in 5% increments**

BUILT IN BRITAIN 3 year warranty

Model shown **XUB12**

Stainless steel basket designed specifically to generate maximum ultrasonic activity, prevent items resting on the tank and prevent operators coming into contact with chemical solutions.

Stainless steel basket, ergonomic lid, SD card and one bottle of M2 Ultrasonic solution included as standard.

SD port allows easy validation tracking between XUB series and PC.

Improved software memory logs cleaning parameters allowing easy cycle repeatability.

Easy traceability of cycle number, time, temperature and sonics validation.

Lid and basket forms a drip collection unit, minimising flow of contaminated liquid once cycle is finished.

Ergonomic lid reduces noise volume and minimises potential of aerosol escape.

Easy to use single touch LCD control panel with user-settable parameters to suit the individual requirements.

Intelligent software remembers last cycle cleaning setting.

Accurate fluid level sensors to ensure bath is not under-filled prior to or during the cycle.

Drain valve for convenient emptying – located at the rear of the unit.

Applications:

- Healthcare/clinical - the first stage of the decontamination process for reusable surgical instruments in dental, podiatry and general practice settings
- General use - glass, equipment, component cleaning, sonication of cytometer nozzles, dispersion and solubulisation
- Laboratories - cleaning of components, degassing fluids, mixing fluids and compounds, cell disruption, fluid dissolution
- Industrial - light manufacturing
- HPLC - degassing of solvents pre analyses
- Biopharm - dissolution of samples

XUBA entry level analogue ultrasonic baths

Compact analogue controlled range of ultrasonic baths providing a high standard of reliable and effective ultrasonic technology. The choice of two baths come in a great value for money package, with M2 cleaning solution, stainless steel basket and ABS plastic lid included as standard (Available in 230V versions only).

- **Excellent entry level ultrasonic bath**
- **Fast, effective, efficient, easy and safe cleaning and processing of diverse instruments, components and solutions**
- **Supplied with stainless steel basket and ABS plastic lid as standard**
- **One bottle of M2 ultrasonic cleaning solution included as standard**
- **Robust design offers outstanding durability and reliability**
- **Control panel easy to operate even when wearing gloves**
- **Timer control from 0-15 minutes on both baths**
- **Ambient +5˚C to 70˚C heating on the XUBA3**

BUILT IN BRITAIN 3 year warranty

Model shown **XUBA3**

Ergonomic lid reduces noise volume and minimises potential of aerosol escape.

One bottle of M2 ultrasonic cleaning solution included as standard.

Simple dial analogue controls for accurate setting of cycle time and temperature (temperature control on XUBA3 only, XUBA1 unheated).

Stainless steel basket and ABS plastic lid forms a drip collection unit to collect excess liquid when the basket is removed from tank.

Stainless steel basket designed specifically to generate maximum ultrasonic activity, prevents items resting on the tank and prevents operators coming into contact with chemical solutions.

Heating function (XUBA3 only) to deliver reduced processing times.

Applications:

- Healthcare/clinical - the first stage of the decontamination process for reusable surgical instruments in dental, podiatry and general practice settings.
- General use - glass, equipment, component cleaning, sonication of cytometer nozzles, dispersion and solubulisation
- Laboratories - cleaning of components, degassing fluids, mixing fluids and compounds, cell disruption, fluid dissolution
- Industrial - light manufacturing
- Biopharm - dissolution of samples

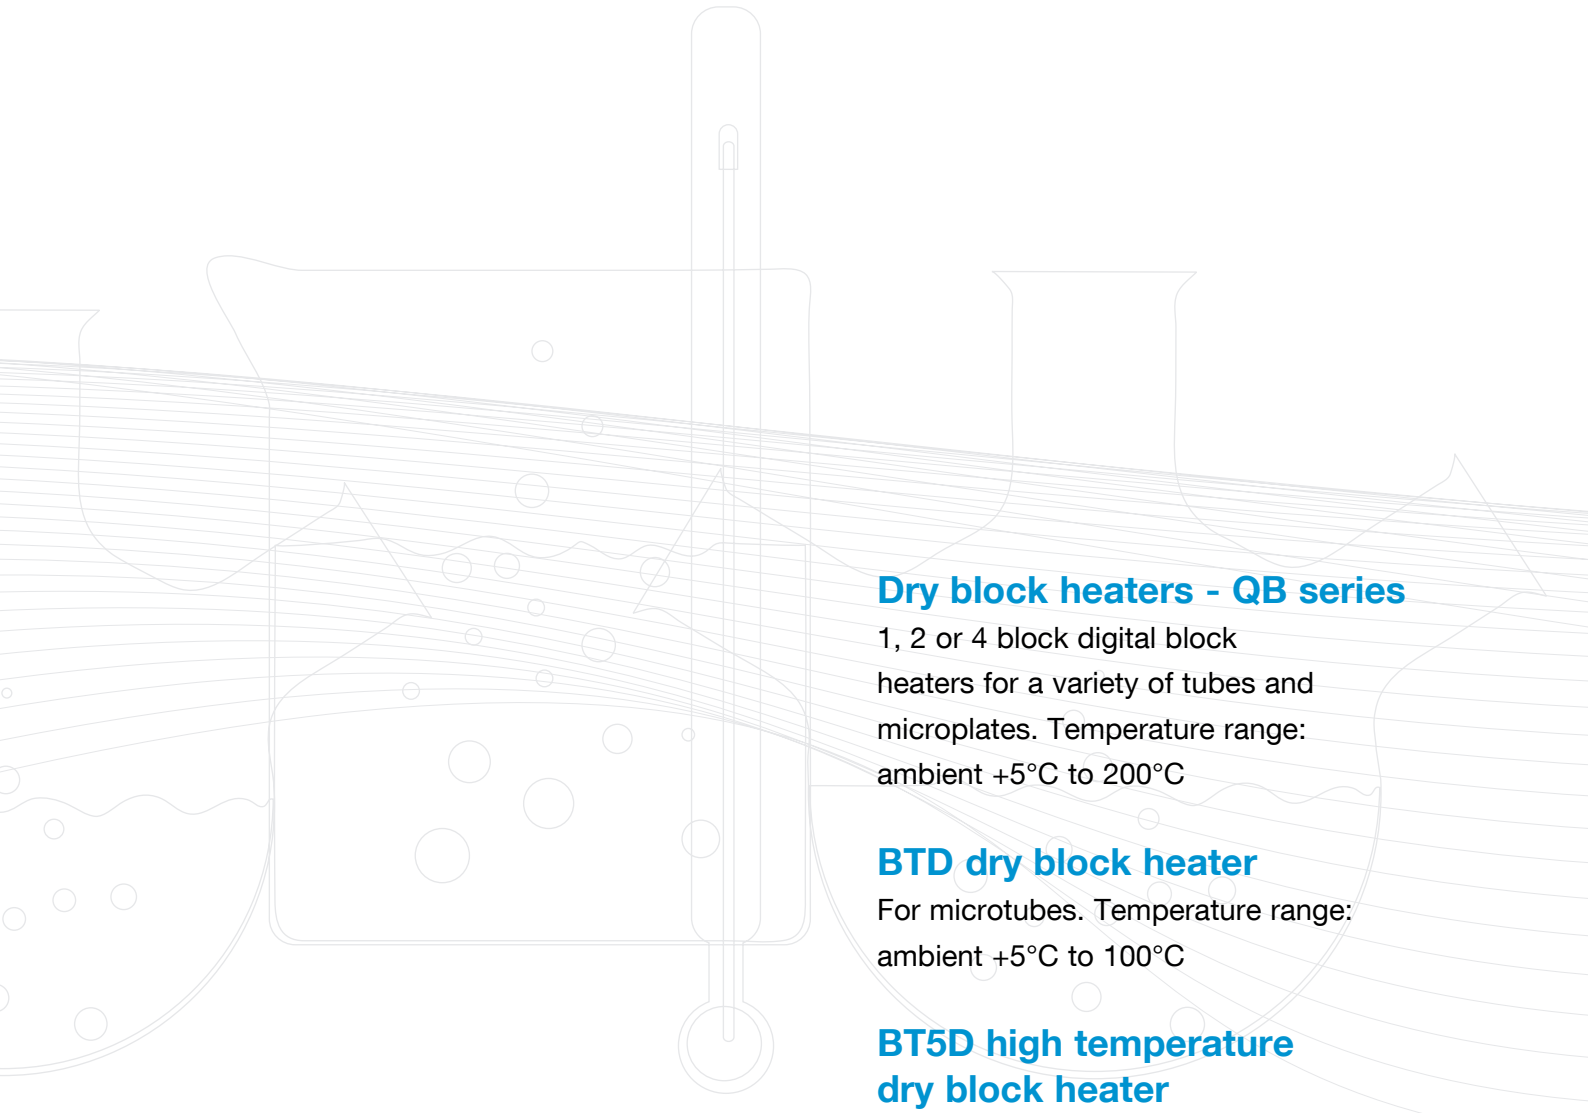
7 Dry block heaters



Dry block heaters - QB series

1, 2 or 4 block digital block heaters for a variety of tubes and microplates. Temperature range: ambient +5°C to 200°C

BTD dry block heater

For microtubes. Temperature range: ambient +5°C to 100°C

BT5D high temperature dry block heater

Temperature range: ambient +10°C to 400°C

QB Dry block heaters

for test tubes, microtubes and microplates Temperature range: ambient +5°C to 200°C

Dry block heating systems combining superb temperature control and uniformity with high quality design and great versatility. A premium product range at an affordable price.

- **Accurate, reproducible, rapid and safe heating of your samples** – due to advanced temperature control combined with high quality, precision-engineered blocks providing excellent thermal contact.
- **Versatile range of interchangeable heating blocks to fit any sample tube or plate** – from our standard range of blocks, or custom-made blocks to suit your application.
- **Full range of models and options for basic through to more sophisticated applications.**

BUILT IN BRITAIN

3 year warranty

QBD1
1 block system

QBD2
2 block system

QBD4
4 block system

Applications:

- General use - incubating samples at set temperatures, heating block for boiling of solutions in tubes
- Life-science – cell digestion, DNA/RNA extraction, post sequencing PCR clean-up - dry down step, boiling in vitro DNA/RNA/protein samples, incubating invitro reactions/digestions, extraction of DNA for real-time PCR analysis, denaturing nucleic acid and protein samples
- Industrial - digestion of environmental samples for chemical oxygen demand analysis, soil digests, maintaining temperatures
- Biopharm - conductivity testing
- Clinical - acylcarnitines derivatisation, MRSA and PBP2 latex testing, heating flush/media used in egg recovery, fertility to keep test tubes at correct temperature during egg collection

Showcase – **mid range/general purpose** example

Model QBD2* stability and uniformity ±0.1°C, temperature range: ambient +5 to 130

130°C

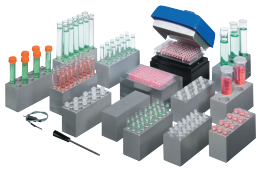
A versatile general purpose system with two removable/interchangeable blocks and a comprehensive specification to suit most dry block heating applications in the laboratory.

- **Stability and uniformity: ±0.1°C**
- **Digital temperature control for optimum precision**
- **Heating range: ambient +5°C to 130°C, with rapid heat-up time**
- **Range of convenient features including alarms, single and dual point calibration, programmed start/stop, 'offset' for known sample temperature variation and choice of external or internal probes**
- **External probe available for accurate temperature control in a tube**

BUILT IN BRITAIN 3 year warranty

Microplate or microtube blocks for 0.2 ml tubes, strips and 96-well microplates used in molecular biology and biotechnology applications.

Wide range of interchangeable blocks (order blocks separately)– extraction tool supplied as standard for easy and safe removal of blocks.

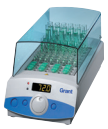


Custom blocks – for virtually any tube or vessel.

High power heater for fast heat-up – from 25°C to 100°C in only 20 minutes.

Over temperature cut-out protects your samples and your workplace.

Optional safety cover – protects samples from contamination and users from accidental contact with hot blocks.



Convenient timer facility, with audible buzzer, for reaction timing and function timing, e.g. delayed heater switch-on/turn-off.

Simple to use rotory dial plus two keys for fast, accurate set-up.

Compact footprint and sloping fascia optimise benchspace and ensure clear visibility during set-up and in use.

High quality, robust construction in streamlined coolwall aluminium and chemical-resistant plastic – durable in demanding environments.

*** Custom blocks available - please email salesdesk@grantinstruments.com for further information**

BTD fixed block system for microtubes

Stability and uniformity ±0.1°C, range ambient +5°C to 100°C

A compact and flexible fixed block system for rapid and precise heating of microtubes up to 100°C.

- **Digital temperature control for optimum precision**
- **Stability: ±0.1°C**
- **Uniformity: ±0.1°C**
- **Temperature range: ambient +5°C to 100°C, with rapid heat-up time**
- **Capacity for up to 49 microtubes in a combination of four common sizes**
- **Integral timer**

MADE IN EUROPE

2 year warranty

Heating block holds combinations of four microtube sizes simultaneously – up to a total of 49 tubes:
- 24 x 1.5/2.0 ml
- 15 x 0.5 ml
- 10 x 0.2 ml

Powerful heater for rapid heat-up times.
- 25° to 37°C in just 4 minutes
- 25° to 100°C in just 15 minutes

Sturdy, durable, easy-to-clean plastic outer case; compact design with small footprint.

2-line display for simple and precise setting of temperature/time showing actual and preset values.

Convenient integral timer for time-sensitive incubations.

Applications:
- Life-science/cancer research - DNA extraction incubations, DNA denaturation, PCR, ELISA and Western blotting, molecular biology
- General - heating samples

BT5D high temperature dry block heater Temperature range: ambient +10ºC to 400°C

Convenient digitally controlled dry block heating system for high temperature applications. Provides temperature control without the need for fluids and reduces the risk of contamination.

- **Temperature range: ambient +10ºC to 400ºC**
- **Stability: ±0.5ºC, uniformity: ±1%**
- **Timed or continuous operation**
- **Choice of two models with different block capacities**

BUILT IN BRITAIN 3 year warranty

Robust construction for long term durability and reliability.

Digital controller for accurate and reproducible time and temperature setting.

Raised feet to protect the work surface from extremely high temperatures.

Choice of two models:
BT5D-16 for 38 x ø16mm tubes
BT5D-26 for 22 x ø26mm tubes
Custom sizes available, please enquire for further information.

Adjustable over temperature cut-out protects users, valuable samples and the workplace.

Applications:

- Veterinary laboratories - digestion of tissue samples for lead analyses
- Chemical laboratories - organic synthesis
- Technology and research - materials (explosives) testing
- Any application requiring heating in a dry block up to 400°C

PMR-30 platform rocker – fixed tilt

Compact but highly functional fixed-angle platform rocker in the Grant-bio range, providing a smooth side to side rocking motion for gentle sample agitation in tubes, culture flasks, dishes and boxes. Suitable for use in cold rooms and incubators.

- **Variable speed: 5 to 30 oscillations per minute**
- **Fixed 7° tilt angle**
- **Load up to 1kg**
- **Continuous or timed operation, with automatic switch-off**
- **Direct drive mechanism**

MADE IN EUROPE

2 year warranty

Reliable and extremely quiet motor produces regulated and reproducible rocking throughout the speed range.

Compact, sturdy construction with a low profile and small footprint – fits neatly into the smallest workspace.

Simple timer setting, with large easy-to-read LED display indicating clearly the time remaining.

Smooth, non-slip mat supplied as standard – prevents vessels from slipping.

Simple graduated speed setting – from 5 to 30 oscil/min.

Select either continuous or timed operation – the integral electronic timer ensures accurate count-down for repeatability of time-sensitive incubations.

Ambient operating temperature range of +4°C to 40°C allows use in cold room or incubator.

Applications:

- Life-sciences - ideal for minigel destaining after electrophoresis, conducting reactions of Northern, Southern and Western blots, immunoblots, hybridisation washes, cell culture, visualisation of blots, immunostaining, protein electrophoresis

PMR-100 platform rocker – adjustable tilt

Large capacity, adjustable angle and speed platform rocker, providing soft or intensive side to side rocking for optimal mixing of samples. Suitable for use in cold rooms or incubators with ambient operating temperature range +4°C to 40°C.

- **Variable speed: 1 to 99 oscillations per minute**
- **Tilt angle range, adjustable up to 10°**
- **Load up to 5kg**
- **Continuous or timed operation, with automatic switch-off**

MADE IN EUROPE

2 year warranty

Applications:

- Life-sciences - soft or intensive mixing of solutions or nutrient media in vessels or plastic bags placed on the platform. Northern, Southern and Western blots, incubation in immunoassays, agglutination tests. Ideal for gel destaining after electrophoresis and homogenisation of extraction media. Destaining/staining of hybridisation strips

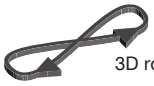
PS-3D fixed tilt 3D platform rotator

Variable speed, fixed angle 3D rocker-rotator in the Grant-bio range providing smooth orbital motion for mixing in commonly used vessels – culture flasks, dishes, boxes and tubes. Suitable for use in cold rooms and incubators.

- **Variable speed: 5 to 60rpm**
- **Fixed 7° tilt angle**
- **Loads up to 1kg**
- **Ambient operating temperature range +4°C to 40°C**



MADE IN EUROPE

2 year warranty

The gentle movement is ideal for staining gels without destroying the gel edges, or for keeping fragile tissue intact during incubations.

Smooth, reliable, extremely quiet motor; low power consumption.

Simple speed adjustment from 5 to 60rpm.

Robust direct drive mechanism provides enhanced reliability capable of 7 days continuous operation.

215 x 215mm platform accommodates most commonly used vessels. Smooth, non-slip mat supplied as standard.

Compact, sturdy construction with a low profile and small footprint – fits neatly into the smallest workspace.

Low voltage cord easily fits through door gaskets, allowing use in incubators, refrigerators and workstations. Safe with low energy consumption.

Applications:

- Education / research / clinical - mixing blood samples, minigel staining and destaining, washes, blotting, hybridisation

PS-M3D multi-function 3D rocker-rotator

Variable speed, fixed-angle, multi-function 3D rocker-rotator providing all that is required – rotation, reciprocation and vibration – to fully optimise the mixing of different sized particles in flasks, dishes, petri dishes and boxes.

- **3D rotation, reciprocation and vibration functions all in one product**
- **3D rotation speed: 1 to 100rpm**
- **Reciprocal 3D rotation: 1 to 360° turning angle**
- **Vibration: 1 to 5° turning angle, programmable in a burst of 1 to 5 seconds**
- **Fully programmable sequence of all functions**
- **Loads up to 1kg**

Smooth, non-slip mat supplied as standard – prevents vessels from slipping.

Compact, with a low profile and small footprint, extremely quiet in operation – fits neatly and unobtrusively into the workspace.

Very easy to operate, with simple set-up of multi-segment programs via push buttons and the 2-line LCD status display.

Low voltage cord easily fits through door gaskets, allowing use in incubators, refrigerators and workstations. Safe with low energy consumption.

All actions – rotation, reciprocation and vibration – can be set for continuous or timed operation, or linked together in different combinations to ensure optimum mixing conditions for your application.

Reliable stepper motor and sturdy construction will deliver years of consistent performance.

Ambient operating temperature range of 4°C to 40°C.

Applications:

- Education/clinical/research labs - suitable for mixing applications in many different fields, with specific applications including: immuno precipitations and other affinity matrix applications, treatment of adherent tissue culture in small volumes, e.g. for trypsinisation, gel staining and destaining, antibody staining, washes, hybridisations, Southern blots, Western blots, in situs

PDM – dimpled mat		•	•

PTR-25 360° vertical mini rotator

Compact, economy solution with simple to use controls, providing thorough mixing of samples in tubes up to 50ml. Suitable for use in cold rooms and incubators, operating at ambient temperature range +4°C to 40°C.

- **360° vertical rotation**
- **Vertical rotation speed range: 5 to 30rpm**
- **Timer with audible alarm and automatic switch-off**
- **Simple to use controls**

MADE IN EUROPE

2 year warranty

Very easy to operate with simple controls and easy to view LCD screen.

Digital timer with audible alarm, alerts when attention is required.

Compact with a low profile and small footprint – fits neatly into the workspace.

Low voltage cord easily fits through door gaskets, allowing use in incubators, refrigerators and workstations.

Platform accommodating 22 tubes (up to 15mm diameter) is included as standard. See additional accessories on page 8.10. Platform PPRS4-12 shown.

Reliable and extremely quiet motor produces regulated rotation throughout the speed range.

Applications:

- Life-sciences - hybridisation reactions, cell growth, soft extraction, homogenisation of biological components in solution, binding reactions, washing of magnetic particles, preventing blood coagulation
- Any application requiring simple end over end rotation of tubes

PTR-35 and PTR-60 360° vertical multi-function rotators

Compact and efficient variable-speed, variable-angle vertical rotators providing all the functionality – vertical rotation, reciprocation and vibration for thorough mixing of microtubes and reproducible sample preparation. All mixing functions can be linked or used separately.

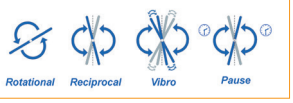
- **360° vertical rotation, reciprocation and vibration functions all in one compact product**
- **Choice of two models with different tube capacities**
- **Vertical rotation speed: 1 to 100rpm**
- **Reciprocal rotation: 1 to 90° turning angle**
- **Vibration: programmable in a burst of 1 to 5 seconds**
- **Fully programmable sequence of functions, including pause**
- **Optional extra platforms to accommodate microplates and tubes up to 50ml see page 8.10**

MADE IN EUROPE

2 year warranty

PTR-35 model shown

All actions – rotation, reciprocation and vibration – can be set for continuous or timed operation, or linked together in different combinations to ensure optimum mixing conditions for your application.



Very easy to operate, with simple set-up of multi-segment programs via push buttons and the 2-line LCD status display.

Reliable and extremely quiet motor produces regulated and reproducible rotation throughout the speed range.

Compact with a low profile and small footprint – fits neatly into the workspace.

Low voltage cord easily fits through door gaskets, allowing use in incubators, refrigerators and workstations. Safe and economical running.

Supplied with platform accommodating up to 26 microtubes. Maximum rotating speed of up to 100 rpm.

The **PTR-60** has the same functionality as the PTR-35 and is supplied with platform accommodating up to 48 microtubes .

Applications:

- Life-science laboratories - for hybridisation reactions, cell growth, soft extraction and homogenisation of biological components in solutions, as well as for reactions of binding and washing of magnetic particles, cell suspensions, incubations, extraction procedures, gel ashing and mixing capillary blood samples.

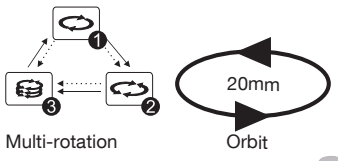
PSU-20i multi-functional orbital multi platform shaker

Powerful and efficient microprocessor controlled, multi-functional orbital shaker providing all that is required to mix your samples – rotation, reciprocation and vibration. This enables optimisation of the mixing, whether in flasks, beakers, petri dishes or other laboratory vessels.

- **Orbital motion (20 to 250 rpm), reciprocation (20 to 250 rpm) and vibration functions all in one product**
- **Loading capacity: 8kg**
- **Fully programmable sequence that can use one or all the functions**
- **6 interchangeable platforms for vessels up to 1000ml including a multi-level platform to hold a large number of various microplates, Petri dishes and culture bags.**
- **Reciprocal rotation: 0 to 360° turning angle, in 30 degree steps**
- **Vibration: 0 to 5° turning angle, 1 degree steps**

MADE IN EUROPE

2 year warranty



PSU-20i fitted with PUP-330

Universal detachable platform accommodates vessels of different shapes and sizes for maximum flexibility. **Please order separately.** See page 9.4 for full list of accessory platforms. No tools are needed to change the platform.

Powerful, reliable and exceptionally quiet motor – combines an 8kg loading capacity with consistent even motion and quiet operation.

2-line LCD status display of actual and set parameters.

Very easy to operate, with simple set-up of multi-segment programs via push buttons.

Direct drive system and brushless motor.

All mixing functions – orbital motion, reciprocation and vibration – can be set for continuous or timed operation, or be linked together in different combinations to establish optimum mixing and ensure accurately repeatable conditions for your application.

Low voltage cord easily fits through door gaskets, allowing use in incubators, refrigerators and workstations. Safe and low energy consumption.

Platform sold separately

Applications:

- Biomedical and biopharmaceutical laboratories - cultivation of cells, extracting, dissolving slow reacting samples, extraction of mineral oil of soil, tissue culture for analytical diagnostics, de-aeration of tested biodegradable materials and samples, rotating closed containers for dialysis, bacterial growth

PSU-10i orbital platform shaker

Microprocessor controlled shaking platform providing smooth and quiet horizontal orbital motion for mixing in bottles, flasks and beakers.

- **Variable shaking speed: 50 to 450rpm**
- **Reliable direct drive system**
- **Automatic load balancing system**
- **Continuous or timed operation with automatic switch-off**
- **5 interchangeable platforms for vessels up to 250ml including an 88 place spring loaded platform for tubes up to 30mm diameter**
- **Simple to set up and easy to operate**
- **Loads up to 3kg**

PSU-10i fitted with PUP-12 universal platform

Soft start feature ensures a smooth ramp-up – avoids potential damage to vessel content.

Exceptionally quiet motor – consistent and even shaking.

2-line LCD display clearly indicates both set and actual shaking speed, plus set and elapsed time.

Works in combination with simple push buttons for easy set-up.

Choice of 5 interchangeable platforms to suit different types of vessels – maximum flexibility. **Please order platform separately.**

Low voltage power supply provides for safe cold room operation and low energy consumption.

Integral electronic timer with audible alarm and automatic switch-off – accurate repeatability of time sensitive incubations.

* Platforms sold separately.

Applications:

- Biotechnology and microbiology - micro-organism cultivation and extraction of biologically active substances
- Immunology and biochemistry - agglutination and precipitation assay
- Biochemistry - washing off electrophoresis gel
- Molecular and cell biology - cultivation of biological liquids

PMS-1000i microplate shaker

Compact and efficient variable speed, horizontal shaker for reliable, regulated shaking of two or four microplates.

- **Variable shaking speed: 150 to 1200rpm**
- **Direct drive and brushless motor**
- **Set and display the speed in rpm**
- **Quick and easy screw fitting of standard-depth multiwell plates**
- **Continuous or timed operation, with automatic switch off**
- **Holds two or four microplates**
- **Operating temperature: +4˚C to 40˚C**

PMS-1000i fitted with platform for two microplates

Platform for two microtitre plates supplied as standard. Platform for four plates (MPP4) available as an option.

Quick and easy to use screw fittings – keep the plates securely in position and allow fitting of any standard-depth well plates.

Digital setting to adjust the speed to suit the application – gentle shaking to ensure that the well contents remain in situ, or more vigorous agitation for effective aeration across the surface area of each well.

Easy-to-use integral electronic timer ensures accurate countdown and repeatability of incubations.

Easy to read LED display clearly indicates time remaining on timed operation and displays actual speed (rpm).

Low voltage cord easily fits through door gaskets, allowing use in incubators, refrigerators and workstations. Safe and economical running.

Applications:

- Life-science - immunoassay, shaking ELISA plates, staining cells for flow cytometry, shaking by paramagnetic beads for RNA extraction from serum and milk, 96 well plate preparation prior to LC-MS/MS, plate shaking for library preparation, shaking plates in cold rooms
- Food & Beverage - histamine in cheese, vitamins in milk testing

MPS-1 high speed shaker/vortex mixer for plates and microtubes

An economical solution that takes up very little bench space, for all high-speed shaking and vortex mixing of plates and tubes from 0.2ml through to 50ml. Efficient mixing of difficult samples - compact pellets, small or viscous samples.

- **Versatile for single tube vortex to shaking of microplates, PCR plates, microtubes and deepwell plates**
- **Mixing of 0.2ml to 50ml microtubes at high speed**
- **Saw-tooth pulse mode**
- **Very small footprint**
- **Safe in humid environments due to low voltage 12V power supply**
- **Quiet <50dBA**
- **Can be used at temperatures from +4ºC to 40ºC**
- **Adjustable rpm or 4 presets**
- **Grant renowned technical and service support**

Supplied with a platform to allow vortexing of single tubes and skirted plates.
Additional inserts for microtubes sold separately or available as part of MPS-1-K (see page 9.8).

Markets:	• Education, research, QC, QA, R&D, Biopharm and healthcare
Applications:	• Life science applications, molecular biology, cell biology, cell lysis, DNA isolation and purification, sample preparation for PCR, pellet re-suspension, mixing viscous liquids, multiple microtube mixing

V-32 multi vortex mixer

Versatile multi vortex mixer for vigorous re-suspension of cell or chemical pellets in tubes up to 1.5ml, with the facility to mix individual tubes up to 15ml.

- **Adjustable speed control: 500 to 3000rpm**
- **'Continuous' or 'quick' operation**
- **Handles up to 32 tubes in three different sizes combinations or a larger tube with the single platform head**

Compact rugged design plus powerful motor delivering consistent performance and quiet operation – fits neatly and unobtrusively into the workspace.

Easy operation – select 'continuous' or 'touch' operation and dial to control speed from 500rpm to 3000rpm.

The 32-socket universal platform PV-32 and single tube platform PL-1 included as standard

PV-32 for three tubes sizes (16 x 1.5ml, 8 x 0.5ml, 8 x 0.2ml)

PL-1 for mixing individual tubes up to 15ml provides maximum flexibility

Optional 6 x 10ml platform available

Low voltage cord easily fits through door gaskets, allowing use in incubators, refrigerators and workstations.

Rubber suction pads hold tight to the work surface and prevent the unit from 'walking' – they also absorb vibration and prevent its transmission to the workbench.

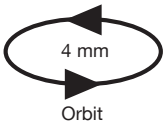
Applications:

- Life-sciences - performing various DNA operations — deproteinisation of DNA/protein complexes, mixing of immunostained human cells, purification of low-molecular DNA/RNA fragments in PCR-diagnostic
- Industrial - de-airing adhesive
- General - mixing and dispersion of particle suspensions
- Biopharm - solubilising powders

PV-1 personal vortex mixer

Extremely compact personal vortex mixer with a low profile and small footprint for gentle mixing through to vigorous re-suspension of cell or chemical pellets in up to 50ml tubes.

- **Adjustable speed control: 750 to 3000rpm**
- **'Continuous' or 'touch' operation**
- **For tubes up to 28.5mm diameter, 50ml**



Pressure sensitive cup accommodates tubes up to 50 ml.

Reliable and extremely quiet motor produces regulated and reproducible agitation throughout the speed range.

Extremely easy to operate – select either 'continuous' or 'touch' operation and turn the dial to adjust the speed from 750rpm to 3000rpm.

Low voltage cord easily fits through incubator door gaskets. Safe and economical running.

In 'touch' mode, agitation starts in response to pressure on the pressure sensitive cup.

Exceptionally compact with a low profile and small footprint – fits into almost any location.

Rubber suction pads hold tight to the work surface and prevent the unit from 'walking' – they also absorb vibration and prevent its transmission to the workbench.

Applications:

- Gentle mixing through to vigorous resuspension of cells and biological and chemical liquid components

MMS-3000 mini magnetic stirrer

Compact mini magnetic stirrer for routine laboratory procedures.

- **Adjustable speed control: 0 to 3000rpm**
- **Maximum stirring volume: 20 litres**

MADE IN EUROPE

2 year warranty

Handles volumes up to 20 litres.

Rugged stainless steel plate provides a working surface of 160mm.

Quiet operation, small size – fits neatly into the workspace.

MMS-3000 is equipped with a detachable stand that allows inserting different sensors (temperature, pH etc.) inside the liquid.

Magnetic cylinder-shape stirring bar (6 x 25 mm) supplied as standard.

Easy to use graduated dial for quick and convenient selection of mixing speed.

Applications:

- PH metering, extraction and dialysing with small quantities of substances
- Any requirement for stirring solutions up to 20 litres

MMS-3000 mini magnetic stirrer – Technical specifications

		MMS-3000
		Mini magnetic stirrer
		 h: 75mm d: 230mm w: 185mm weight: 1.5kg
Operating temperature range	°C	+4 to 40
Speed	rpm	0 to 3000
Liquid stirring viscosity	mPa	Up to 1170
Stirring volume	L	20
Working plate size	mm	ø 160
External power supply		Input AC 120-230V, 50/60Hz Output DC 12V
Input voltage	V dc	12
Power consumption	W	3 (0.3A)

MSH-300i digital magnetic stirrer hotplate

Digital magnetic stirrer with heating; the MSH-300i Intelli-stirrer is designed for laboratories with higher requirements. It offers digital setting and control of temperature and rotation speed. A powerful magnet allows mixing solutions with glycerine viscosity level. Maximum volume of stirred liquid is 20 litres.

- **Adjustable speed control: 100 to 1250rpm**
- **Maximum stirring volume: 20 litres**
- **2 year warranty, Grant renowned technical and service support**
- **Stirrer bar and retort stand included as standard**

MADE IN EUROPE

2 year warranty

* Optional, please order separately

Applications:

- Clinical/Healthcare - thawing/heating/stirring samples
- Pharmaceutical - Heating and stirring samples
- Science education in schools/universities - practical science demonstration and experimentation
- Industrial - QC testing, sample preparation

MSH-300i digital magnetic stirrer hotplate – Technical specifications

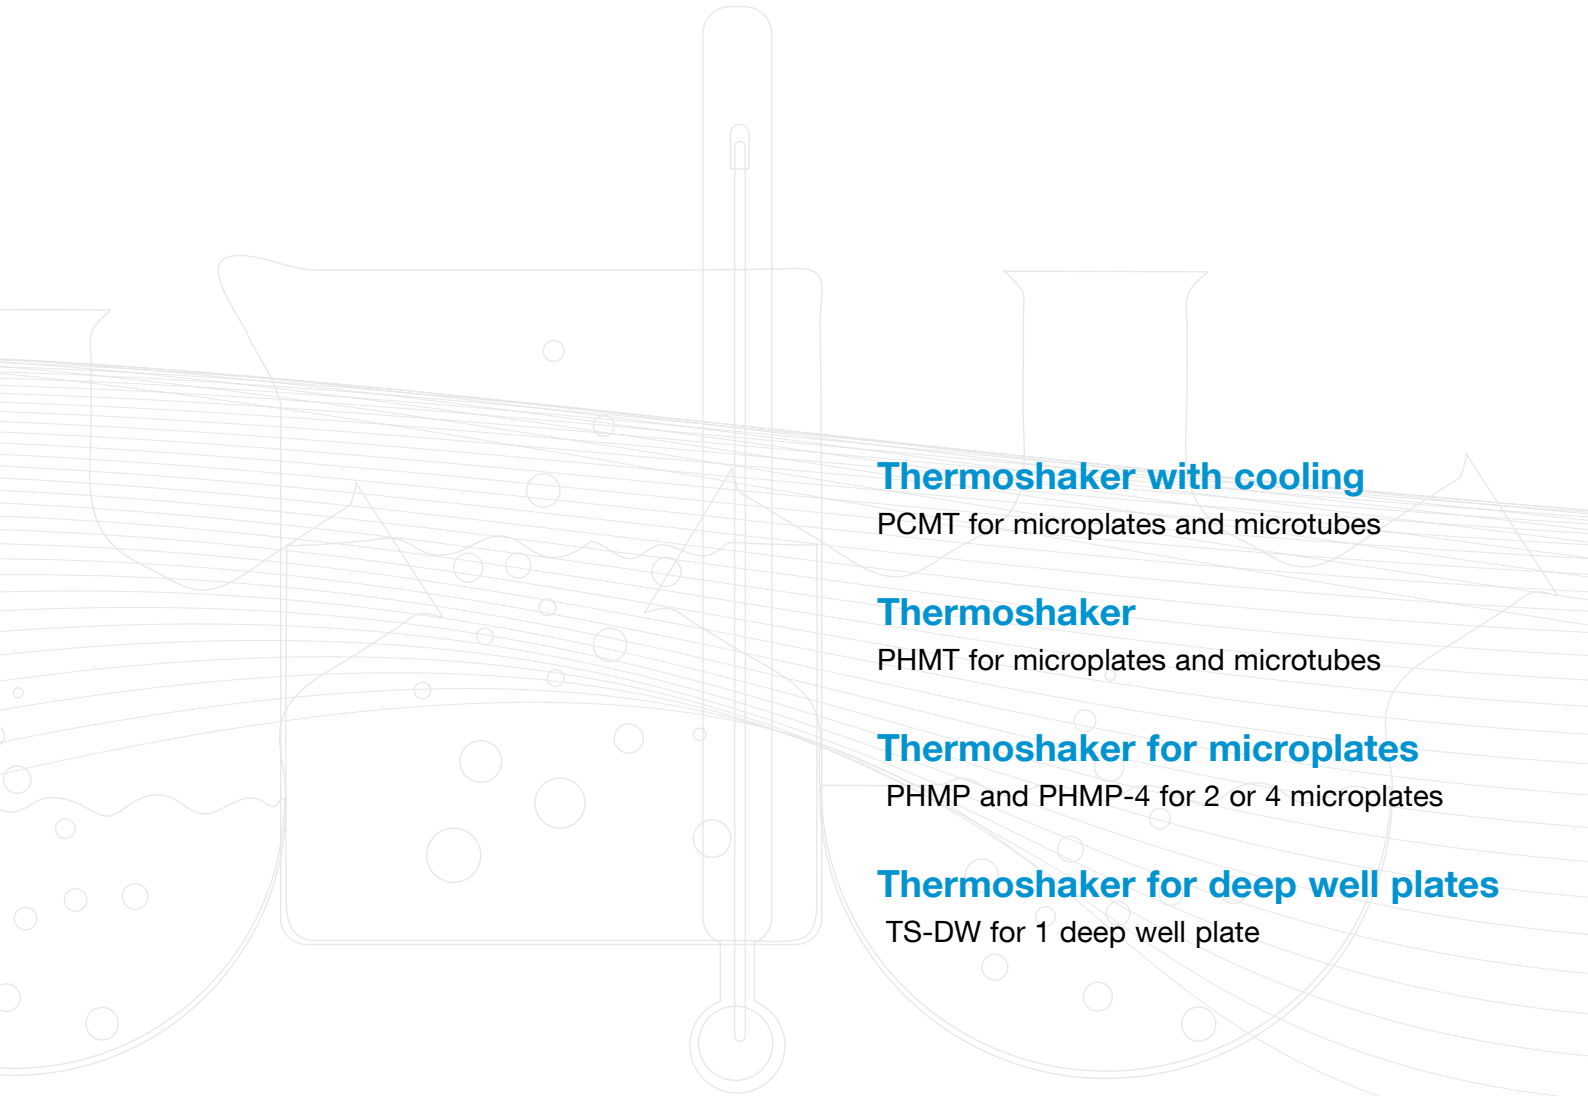
10 Thermoshakers



Thermoshaker with cooling

PCMT for microplates and microtubes

Thermoshaker

PHMT for microplates and microtubes

Thermoshaker for microplates

PHMP and PHMP-4 for 2 or 4 microplates

Thermoshaker for deep well plates

TS-DW for 1 deep well plate

Thermoshakers

A range of compact, efficient and highly versatile thermoshakers, with excellent temperature uniformity, ideal for applications requiring heating/cooling and shaking in microplates and microtubes. Suitable for use in cold rooms and incubators (operating temperature range +4°C to 40°C).

By combining the mixing operation with heating/cooling, reaction process times and operator workload are reduced and the efficiency of many procedures is increased, resulting in a higher throughput.

- **Thermoshaker with cooling for microtubes, microplates and PCR plates - PCMT**
- **Thermoshaker for microtubes, microplates and PCR plates - PHMT**
- **Thermoshakers for microplates and PCR plates - PHMP**
- **Thermoshaker for deep well plates - TS-DW**

MADE IN EUROPE

2 year warranty

PCMT thermoshaker with cooling for microtubes and microplates.

PHMT thermoshaker for microtubes and microplates.

PHMP thermoshaker for two microplates.

TS-DW deep well plate thermoshaker.

PHMP-4 thermoshaker for four microplates.

PCMT thermoshaker with cooling for microtubes and PCR plates

Variable speed and temperature, heating and cooling thermoshaker with a choice of blocks for microtubes and microplates.

- A microtube and microplate thermoshaker
- A compact benchtop incubator
- A microtube and microplate shaker

- **Fast heat-up and cooling times**
- **Temperature setting range: +4˚C to 100˚C**
- **Temperature control range: ambient -15˚C to +100˚C**
- **Shaking speed: 250 to 1400rpm**
- **Temperature stability: ±0.1˚C**
- **Improved fast start 3s to maximum shaking speed**
- **Temperature calibration function**

Fast heat-up and cooling times. Quick to reach specified mixing speed.

Even mixing across the thermoshaker block.

Excellent uniformity across the block.

Digital timer with sound alarm - 1 min to 96 hours.

Temperature calibration function to compensate for differences in the thermal behaviour of different tubes and samples.

Low voltage cord fits easily through door gaskets, safe and economical running.

PCMT microplate and microtube thermoshaker with cooling

Choice of 5 interchangable blocks:
- HC18 (20 x 0.5ml and 12 x 1.5ml microtubes)
- HC32 (20 x 0.2 ml and 12 x 1.5ml microtubes)
- HC24N (24 x 1.5ml microtubes)
- HC24 (24 x 2ml microtubes)
- HC96 (96-well microplate for PCR, 0.2ml)

Block is required. Specify when ordering.

Quiet motor operation, compact size and reliable.

Clear 16 x 2 character LCD display indicates the set and actual time of operation, mixing speed and temperature.

Simultaneous or independent heating/cooling and mixing functions.

Fast start - acceleration 3 seconds.

Applications:

- Life-science - genetic analyses, extraction of DNA, RNA and further sample preparation, biochemical studies of enzymatic reactions and processes, extraction of metabolites from cellular material, incubation, agitation, digestion of samples/standards for peptide mapping

Note: PCMT unit supplied without a block, please order from above.

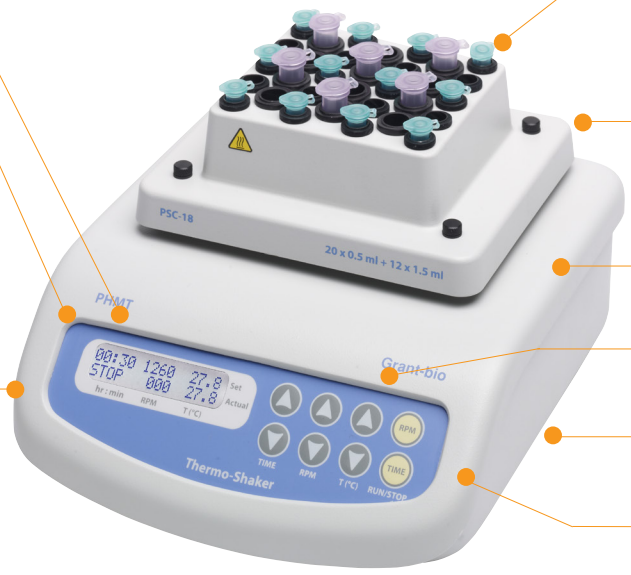
PHMT - thermoshaker for microtubes and PCR plates

Variable speed, variable temperature thermoshaker combining three instruments in one for maximum versatility and efficiency:

- A microtube and microplate thermoshaker
- A compact benchtop incubator
- A microtube and microplate shaker in cold or ambient temperatures

- **Capacity for up to 24 or up to 32 microtubes or PCR 96 well plate**
- **Temperature setting range: +25°C to 100°C**
- **Temperature control range: +5°C above ambient to 100°C**
- **Shaking speed: 250 to 1400rpm**
- **Rapid heat-up speed**
- **Continuous or timed operation, with alarm and automatic switch-off facility**
- **Improved fast start: 3 seconds to maximum shaking speed**
- **Temperature calibration function**

Model PHMT-PSC18 shown



2-line LCD display clearly indicates both set and actual values for temperature, shaking speed and time.

Easy programming via simple push buttons and display.

Choice of five models available:
- **PHMT-PSC18** (20 x 0.5ml plus 12 x 1.5ml microtubes)
- **PHMT-PSC24N** (24x 1.5ml microtubes)
- **PHMT-PSC24** (24x 2.0 ml microtubes)
- **PHMT-PSC32** (20x 0.2ml microtubes and 12 x 1.5ml microtubes)
- **PHMT-PSC96** (96-well PCR plates, 0.2ml)

Unit supplied with a block, please specify when ordering.

Convenient interchangeable block for 20 or 12 microtubes provides flexibility for an easy change in application.

Temperature calibration function to compensate for differences in the thermal behaviour of different tubes and samples.

The powerful motor operates extremely smoothly, quietly and consistently. With 'soft' start function for delicate samples.

Timer 1 min to 96 hours.

Low voltage cord easily fits through door gaskets, allowing use in incubators, refrigerators and workstations.

Fast start - acceleration 3 seconds.

Compact and sturdy, with a low profile and small footprint – fits neatly into the workspace and provides years of reliable service.

Applications:
- Life-science - genetic analyses, extraction of DNA, RNA and further sample preparation, biochemical studies of enzymatic reactions and processes, extraction of metabolites from cellular material, incubation, agitation, digestion of samples/standards for peptide mapping

TS-DW - deep well plate thermoshaker

A thermoshaker designed for shaking and heating of deep well plates. A multisystem principle, used in the design of the thermoshaker, allows it to operate as 3 independent devices:

- Incubator
- Plate shaker
- Thermoshaker

- **Profiled platform for perfect plate fit and maximum heat transfer**
- **Temperature setting range: +25°C to 100°C**
- **Temperature control range: +5°C above ambient to 100°C**
- **Shaking speed: 250 to 1400rpm**
- **Rapid heat-up speed**
- **Very small footprint**

* Must be ordered separately. Custom platform may be available with a sample

Applications:

- Life science applications, molecular biology, cell biology lab, cell lysis, DNA isolation and purification, sample preparation for PCR, pellet re-suspension, or any other method where you have many samples that need mixing in deep well plates

PHMP, PHMP-100 and PHMP-4 thermoshaker for microplates

Excellent temperature uniformity across the platform/microplate (patented bi-directional heating of microplates) combined with variable speed and variable temperature produces the ideal thermoshaker for microplate incubations.

Can be used with all types of standard depth microplates and offers three devices in one for maximum versatility and efficiency:

- A microplate thermoshaker
- A compact benchtop incubator without shaking
- A microplate shaker in cold or ambient temperatures

- **Temperature setting range: +25°C to 100°C**
- **Stability: ±0.1°C, uniformity: ±0.2°C due to the bi-directional heating system (platform and lid)**
- **Shaking speed: 250 to 1200 rpm**
- **Rapid heat-up**
- **Continuous or timed operation, with alarm buzzer and automatic switch-off facility**
- **Choice of three models with capacity for two or four microplates**
- **Patented dual heating of microplates**
- **Temperature calibration function**

Model shown: PHMP thermoshaker for two microplates

The heated lid completely covers the heating platform to provide bi-directional heating (patented) and a controlled micro-environment. This produces excellent temperature stability and uniformity, whilst preventing condensation.

Display of both set and actual temperature and shaking speed.

Very easy to operate, with simple set-up of temperature, shaking speed and time via push buttons and the 2-line LCD status display.

Soft start/stop protects samples.

The **PHMP-4** has the same functionality as the PHMP but can accommodate four microplates.

The powerful, reliable motor and sturdy construction combine to provide years of consistent operation.

Low voltage cord easily fits through door gaskets, allowing use in incubators, refrigerators and workstations.

Applications:

- Cytochemistry - for in situ reactions
- Biochemistry - for enzyme and protein analysis, incubation for biomarker and protein binding assays
- Immunochemistry - for immunofermentative reaction, ELISA incubation
- Molecular biology (for microbial cell cultivation and DNA analysis)

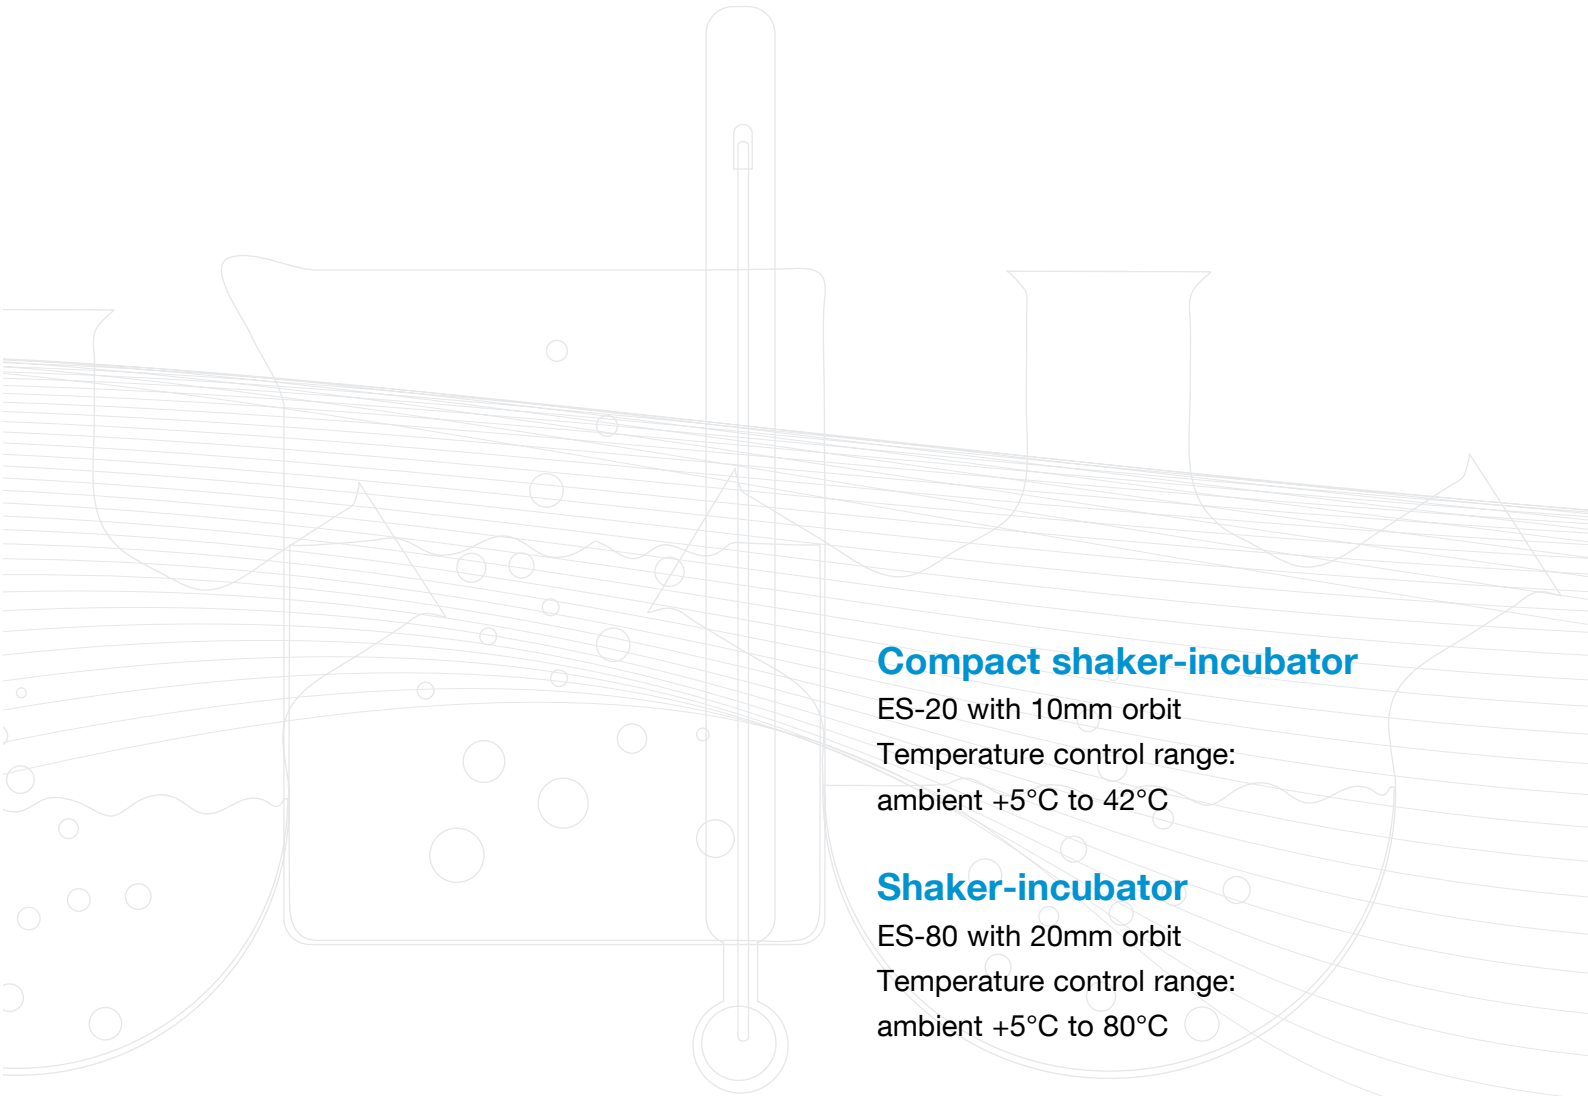
11 Orbital shaker-incubators



Compact shaker-incubator

ES-20 with 10mm orbit
Temperature control range:
ambient +5°C to 42°C

Shaker-incubator

ES-80 with 20mm orbit
Temperature control range:
ambient +5°C to 80°C

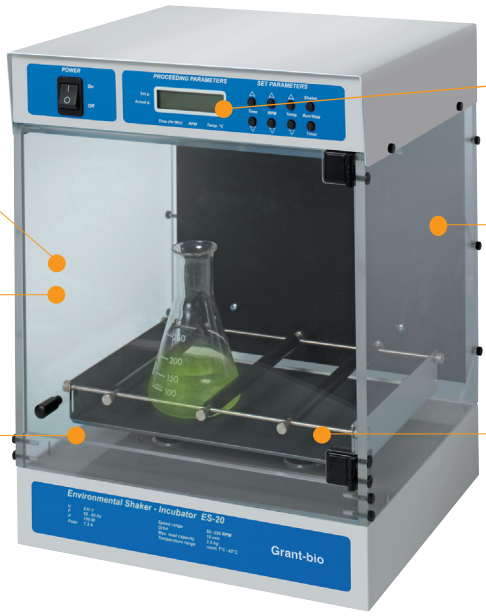
ES-20 compact shaker-incubator

ES-20 compact shaker-incubator

Versatile and programmable bench-top orbital shaker-incubator for mixing and incubating biological cultures and samples in a variety of flasks and vessels.

- **Digital control of time, temperature and shaking speed for accuracy and repeatability**
- **Variable speed: 50 to 250rpm**
- **Temperature setting range: +25°C to 42°C**
- **Load up to 2.5kg**
- **Interchangeable platforms for shaking/incubating different vessels***

ES-20 shaking incubator with PUP-12 universal platform shown (order platform separately)



Temperature control by microprocessor plus forced heated air circulation ensures a constant and even temperature within the chamber.

Designed for easy assembly/ disassembly – easy to move from one location to another. Comes flat packed - no special tools required.

Equipped with direct drive shaking system for reliable, long-term operation.

Simple to programme time, temperature and shaking speed using clear 2-line, 16 character LCD.

Robust, compact construction with clear 7mm thick Plexiglass® panels.

Option of five easily interchangeable platforms for a wide range of applications*.

* supplied without platform, please order separately.

Applications:

- Life-sciences - suitable for growing cell cultures in flasks, extracting tissue samples at physiological temperatures, sample preparation processes, mixing of biological liquids as well as the incubation and cultivation of biological liquids, growing e-coli, bioluminescence preparation

ES-80 Shaker-incubator

ES-80 shaker-incubator

Stable and reliable with programmable time, temperature and shaking speed. This orbital shaker-incubator is ideal for vigorous or even mixing and incubation of samples in a variety of flasks and vessels.

- **Digital control of time, temperature and shaking speed for accuracy and repeatability**
- **Variable speed: 50 to 250rpm**
- **Temperature setting range: +25°C to 80°C**
- **Load up to 8kg**
- **Interchangeable platforms for shaking/incubating different vessels**

ES-80 shaking incubator with P9-500 platform shown (order platform separately)

Simple to programme time, temperature and shaking speed using clear 2-line ,16 character LCD.

Robust, compact construction with stainless steel inside chamber.

Temperature control by microprocessor plus forced heated air circulation ensures a constant and even temperature within the chamber.

'Soft start' and stop protects samples.

Equipped with direct drive shaking system for reliable, long-term operation

Option of five easily interchangeable platforms for a wide range of applications.

State of the art motor, thermal insulation materials and temperature PID-control decreases the energy consumption - preserves the environment.

* supplied without platform, please order separately

Applications:

- Life-sciences - cultivation of micro-organisms, cells and eukaryotic cells including animal, plant and insect cells, long-term cell growth projects, more vigorous shaking possible allowing other sample preparation processes including tissue sample extraction at physiological temperatures and up to 80°C, solubility studies, cell culture, staining/destaining, extraction procedures, gel washing, plasmid purification, bacterial suspension, hybridisation, protein expression in bacteria

12 Centrifuges and combined vortex mixer/ centrifuges

Benchtop centrifuges

LMC-3000 low speed benchtop centrifuge

Combined vortex mixer/centrifuge

PCV-2400 fixed speed micro centrifuge/vortex mixer, 2800rpm

PCV-6000 variable speed micro centrifuge/vortex mixer, max. 6000 rpm

High speed microcentrifuge

Microspin 12, variable speed 100-14,500 rpm

All in one PCR plate centrifuge/vortex

CVP-2 all in one PCR plate centrifuge/vortex.

Centrifuge, max. 1500rpm

Vortex, max. 1200rpm

Centrifuges and combined vortex mixers/centrifuges

A focused range of compact, modern benchtop centrifuges for a variety of biomedical, biochemical and life-science applications requiring centrifuging or a combination of centrifuging and vortex mixing or shaking for microtubes and microplates.

- **General purpose benchtop centrifuge**
- **Combined centrifuges/vortex mixers**
- **High speed microcentrifuge**
- **All-in-one PCR plate centrifuge/vortex**

LMC-3000 general purpose benchtop centrifuge

Low speed benchtop centrifuge with interchangeable rotors for accommodating centrifuge tubes (from 2 to 50ml) or microplates.

- **Spin speed: up to 3000rpm for tubes, up to 2000rpm for microtitre plates**
- **Timed operation (1 to 90 minutes), with automatic switch-off**
- **'Soft-start' and 'run-down' of the rotor**
- **Choice of interchangeable rotors for up to 12 centrifuge tubes or 2 microplates**
- **Auto 'IMBALANCE' stop and warning diagnostics**
- **Low noise level**

MADE IN EUROPE

2 year warranty

LMC-3000 general purpose centrifuge fitted with R-2 rotor shown

Sturdy metal housing and lid, automatic imbalance switch-off and lid lock when centrifuge is running, providing safe operation in your workplace.

Easy set-up of speed and time via 2-line LCD display and simple push buttons showing actual and set speed and time.

Convenient interchangeable rotor for 6 or 12 tubes of varying sizes or 2 microplates (standard and deep well). Please specify when ordering, sold separately.

The powerful and extremely quiet motor has a 'soft-start'and 'run-down' function to avoid jolting of samples.

Compact design with small footprint – fits neatly into the workspace.

Applications:

- Life-science - ELISA plate centrifugation, PCR plate centrifugation, analytical applications including biomedical, bio-organic and immunoenzyme analysis
- Environmental - centrifuging of sewage sludge

PCV-2400 combined combined centrifuge/vortex mixer

Cost-effective, fixed-speed, combined micro centrifuge/vortex mixer for combined or independent centrifuge and mixing applications of microtubes and 0.2ml microtube strips in low volume applications.

Tubes are loaded into the rotor for simultaneous spinning, then removed for individual mixing in the vortex cup located at the top of the central shaft. In spin-mix-spin applications, the Combi-spin™ can be used with very low reagent volumes representing an overall saving in time, labour and material.

- **Centrifugation speed: fixed at 2800rpm / 50Hz and 3500rpm / 60Hz**
- **Continuous operation or short spin**
- **Choice of interchangeable rotors for different microtube sizes/combinations and for 0.2ml strips**
- **Can be used at temperatures from +4ºC to +40ºC**

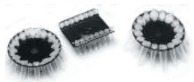
MADE IN EUROPE

2 year warranty

A safety interlock stops the rotor when the lid is opened to ensure you and your workplace remain safe.

The Combi-spin™ is supplied as standard with two interchangeable rotors for 12 x 1.5ml and 12 x 0.5ml + 12 x 0.2ml microtubes

Optional accessory rotors – for 16 and 18 microtubes and for two 8 well 0.2ml strips – allow for quick and easy changes of application.



The vortex cup emerges through an opening in the closed lid, enabling individual tubes to be mixed even while a full load of tubes is spinning.

Very simple to operate – use the left-hand button to select continuous or short spin.

Applications:

- Life-science - genetic engineering research (for PCR-diagnostics experiments). Units can be used in microbiological, biochemical, clinical laboratories and industrial biotechnological laboratories

PCV-6000 combined centrifuge/vortex mixer

Highly versatile and efficient variable-speed combined centrifuge/vortex mixer. Programmed centrifugation and mix operations or independent centrifuging and vortex-mixing of multiple microtubes and 0.2ml strips.

Spin-mix-spin technology can save considerable time by automatically performing a cycling program of sample mixing and spinning 12 tubes at once, when compared with removing the tubes for vortexing after every spin.

- **Centrifugation speed: Up to 6000rpm**
- **Vortex mixing modes - soft, medium and hard with regulated timer of 1 to 20 seconds, with automatic switch-off**
- **Choice of interchangeable rotors for different microtube sizes combinations and for 0.2ml strips**
- **Can be used at temperatures from +4ºC to +40ºC**

MADE IN EUROPE

2 year warranty

A safety lid lock stops the rotor when the lid is opened to ensure you and your workplace remain safe.

Multi-spin™ enables consecutive spin and mix phases of multiple tubes – tubes are loaded into the rotor for spinning and remain in position for vortex mixing, saving time and labour. In addition, lower reagent volumes can be used, providing a further saving.

Simple push-buttons and a clear 2-line LCD status display enable accurate and repeatable setting of spin and mix levels and times. Spin and mix phases can be linked in sequences which can be repeated up to 999 times.

Low voltage cord easily fits through door gaskets, allowing use in incubators, refrigerators and workstations.

Multi-spin™ PCV-6000 shown

The Multi-spin™ is supplied as standard with two interchangeable rotors for 12 x 1.5ml and 12 x 0.5ml + 12 x 0.2ml microtubes.

Optional accessory rotors – for 16 and 18 microtubes and for two 8 well 0.2ml strips – allow for quick and easy changes of application.

Compact design and extremely quiet in operation – fits neatly and unobtrusively into the workspace.

Applications:

- Life-science - genetic engineering research (for PCR-diagnostics experiments). Units can be used in microbiological, biochemical, clinical laboratories and industrial biotechnological laboratories

Microspin 12 high-speed microcentrifuge

Compact high-speed benchtop microcentrifuge with a built-in rotor for 12 x 1.5/2ml microtubes. Ideal for biomedical laboratories.

- **Centrifugation speed: 100-14,500rpm, RCF 12,400 x g**
- **Fixed angular aluminium rotor accommodates 12 x 1.5/2ml microtubes, supplied with adapters for 0.2ml and 0.5ml tubes**
- **Timed operation (1 to 30 minutes), with automatic switch-off**
- **Suitable to use in cold rooms, operating temperature: ambient +4°C to +25°C**
- **Very small footprint**

MADE IN EUROPE

2 year warranty

Metal protective inserts inside the lid and casing, automatic imbalance switch-off and locking of the lid provide safe operation.

Constant airflow around the rotor reduces risk of samples overheating during centrifugation.

Simple push-buttons and a clear 2-line LCD status display shows actual and set values of time, speed and RFC (g-force).

Low voltage cord easily fits through door gaskets, allowing use in incubators, refrigerators and workstations. Safe and economical running.

Brushless motor with fixed angle rotor provides very quiet performance and accommodates 12 x 1.5/2ml microtubes. Equipped with a fixing lid. Additional tube adapters for 0.5ml or 0.2ml microtubes also included as standard.

Rotor imbalance diagnostics: automatic stop, “imbalance” warning.

Rotor can be removed for cleaning and may be autoclaved (not lid).

Compact design and quiet in operation – fits neatly and unobtrusively into the workspace.

Quick spin function – Now starting from 15 seconds.

Applications:

- Life-science - multiple applications including extracting of DNA/RNA samples, sedimentation biological components, biochemical and chemical analyses of microsamples

CVP-2 all-in-one PCR plate centrifuge/vortex

All-in-one PCR plate centrifuge/vortex mixer that allows for the simultaneous sample preparation of multiple samples at one time. Versatile through being able to hold un, semi and fully skirted PCR plates with no additional accessories required.

The CVP-2 offers 3 devices in one:

- Centrifuge with vortex mixing
- PCR plate centrifuge
- PCR plate mixer

MADE IN EUROPE

2 year warranty

- **Centrifuge and vortex mixer combined for significant time saving**
- **Centrifugation mixing speed: 300 to 1500rpm**
- **Independent vortex and centrifuge timers with up to 999 cycles**
- **Adjustable rpm or 4 programmable presets**
- **Consistently prepare up to 192 samples simultaneously**

Clear window allows the user to observe the samples.

Unique device combining both PCR plate spin-down and mixing.

Holds 2 un, semi or fully skirted PCR plates, includes adapters.

Simple push-buttons and a clear 2-line LCD status display of set and actual values.

Adjustable rpm or 4 programmable presets.

Very small footprint saving bench space.

Applications:

- Life science applications, molecular biology, cell biology lab, cell lysis, DNA isolation and purification, sample preparation for PCR, pellet re-suspension, mixing viscous liquids, or any other method where you need tube vortexing and centrifugation and have many samples, particularly in very small volumes

CVP-2 all-in-one PCR centrifuge/vortex – Technical specifications

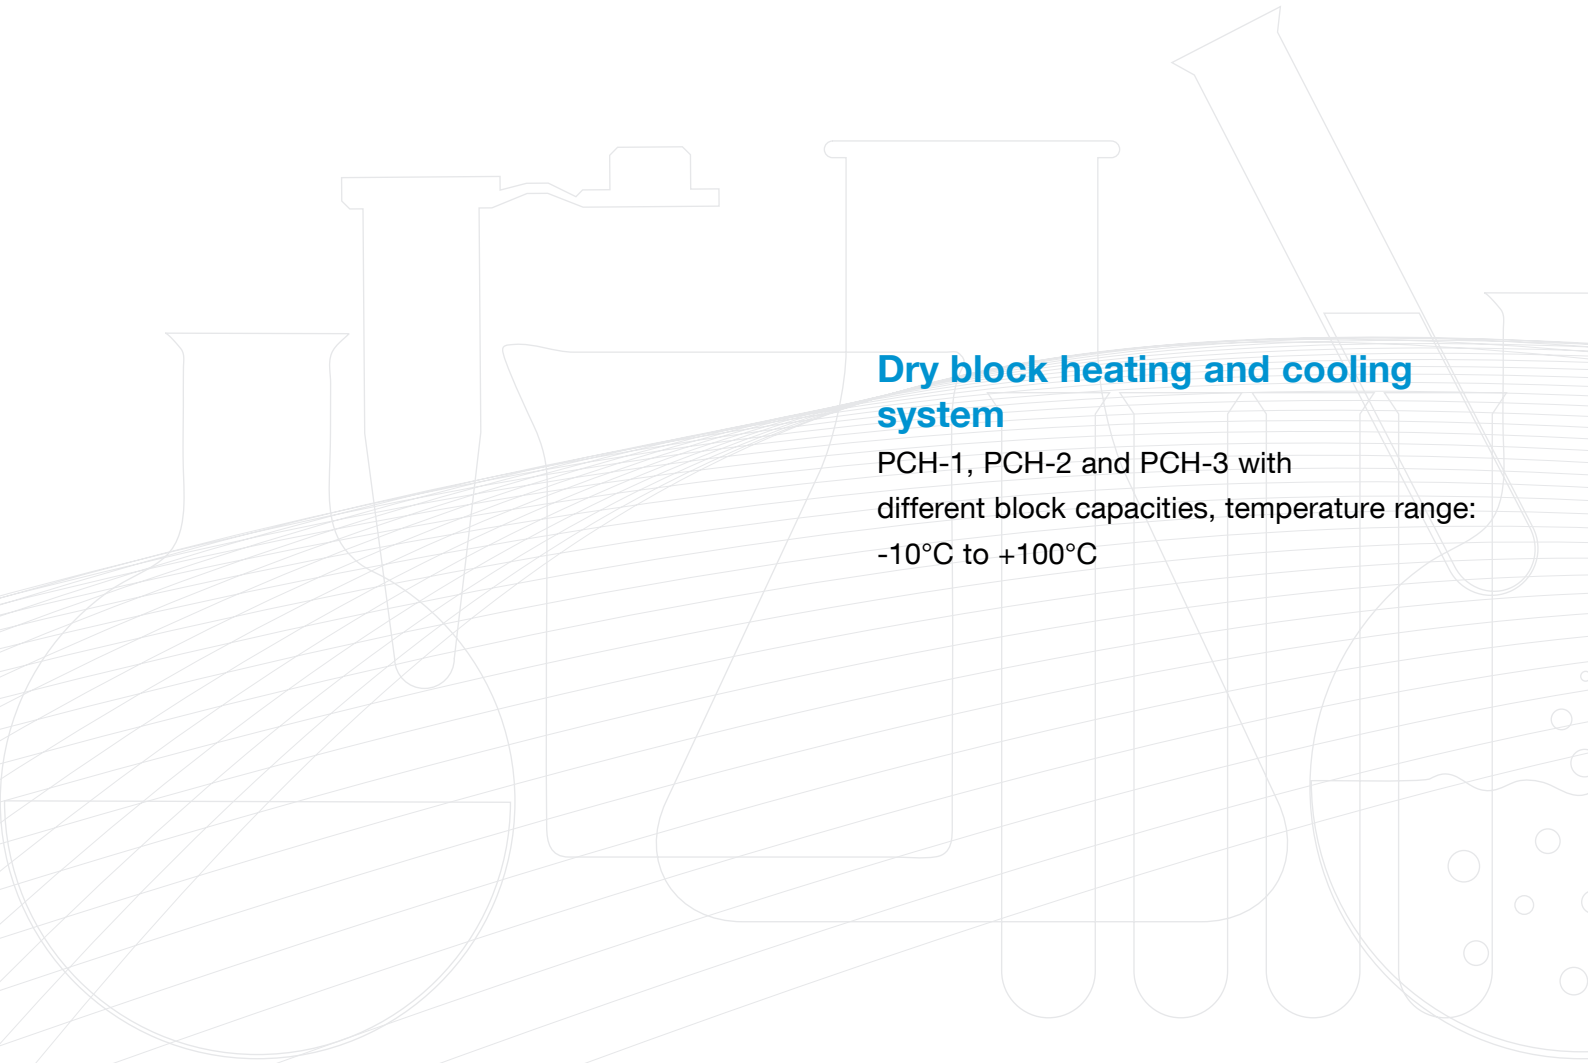
13 Dry blocks for heating and cooling



Dry block heating and cooling system

PCH-1, PCH-2 and PCH-3 with different block capacities, temperature range: -10°C to +100°C

Dry block for heating and cooling

PCH-1, PCH-2 and PCH-3

Compact, flexible, easy to use systems for rapid heating and cooling of microtubes; very effective tools for DNA/RNA sample preparation techniques.

- **Cooling/heating setting range from -10°C to 100°C, with very rapid cool down and heat-up times**
- **Stability: ±0.1°C**
- **Choice of three models: capacity for up to 32 microtubes in a combination of two sizes (PCH-1) or up to 20 microtubes of one size (PCH-2 and PCH-3)**
- **Convenient integral reaction timer with audible alarm**

MADE IN EUROPE

2 year warranty

Ingenious block construction, combined with powerful Peltier cooler, produces very rapid heating and cooling.

Dry temperature control system maintains clean and aerosol-free environment.

2-line LCD display clearly indicates both set and actual values for temperature and time.

Simple push button combinations for easy set-up.

Model PCH-1 shown

PCH-1 Block holds a combination of two microtube sizes simultaneously – up to a total of 32 tubes: 12 x 1.5ml plus 20 x 0.5ml.
PCH-2 up to a total of 20 x 1.5ml mictrotubes.
PCH-3 up to a total of 20 x 2ml microtubes.

Rapid DNA denaturation at 95°C quickly achieved.

DNA denaturation techniques further supported with an audible alarm for denaturation 'time-up'; samples can then be quickly cooled.

Applications:

- Life-science - storing restriction enzymes, nick translations, ligation reactions, restriction digests, protein solubilisation for PAGE, warm incubation of microcentrifuge tubes for hybridisation, enzyme reactions and deactivations
- Clinical - cooling blood samples prior to coagulation testing

14 Densitometers

Densitometers

DEN-1 for 0.3 - 15.0 McFarland units

DEN-1B for 0.00 - >15.00 McFarland units, powered by battery or mains

Densitometers

DEN-1 and DEN-1B

Compact and efficient benchtop densitometers for measuring turbidity of cell suspensions in a variety of life-science applications.

The densitometers are designed and factory calibrated to measure turbidity in the range of 0.3 to 15.0 McFarland units (DEN-1) 0.00 to >15.00 McFarland units (DEN-1B) with a small standard deviation. If required, they can deliver a wider measurement range (up to 15.00 McFarland units), but with a greater standard deviation.

- **Measurement range: 0.3 to 15.0 McFarland units (DEN-1), 0.00 to >15.00 McFarland units (DEN-1B)**
- **Measurement time: 1 second**
- **Precision: ±3%**
- **Standard deviation at 3.00 McFarland units: ±0.1 McF**
- **User calibration option**

MADE IN EUROPE

2 year warranty

Designed for tubes with an outer diameter of 18mm. 16mm tubes can also be accommodated by using the optional tube adaptor D16 (included).

Factory calibrated – retains calibration without power supply. Can be user calibrated with commercial standards or cell suspensions prepared in the laboratory.

DEN-1 and DEN-1B units are calibrated for operation in range 0.3-15.0 McF and 0->15.00 McF, but it is possible to measure turbidity from 0McF to 15McF (note: the standard deviation of the values increases).

DEN-1B densitometer shown

Bright LED display readings, conveniently shown in McFarland units, are clearly visible

Extremely compact design with small footprint and low profile – fits easily into the smallest workspace

Powered by 3 x AA batteries (DEN-1B only) or via external 12v power supply

Note: 1 McF unit is approximately equal to 3 x 10^8 CFU/ml

Applications:

- Life-science - typical applications include determining concentration of cells (bacterial and yeast cells) in the fermentation process, detecting the susceptibility of micro-organisms to antibiotics, identifying micro-organisms with various test systems, and measuring optical density at fixed wavelength

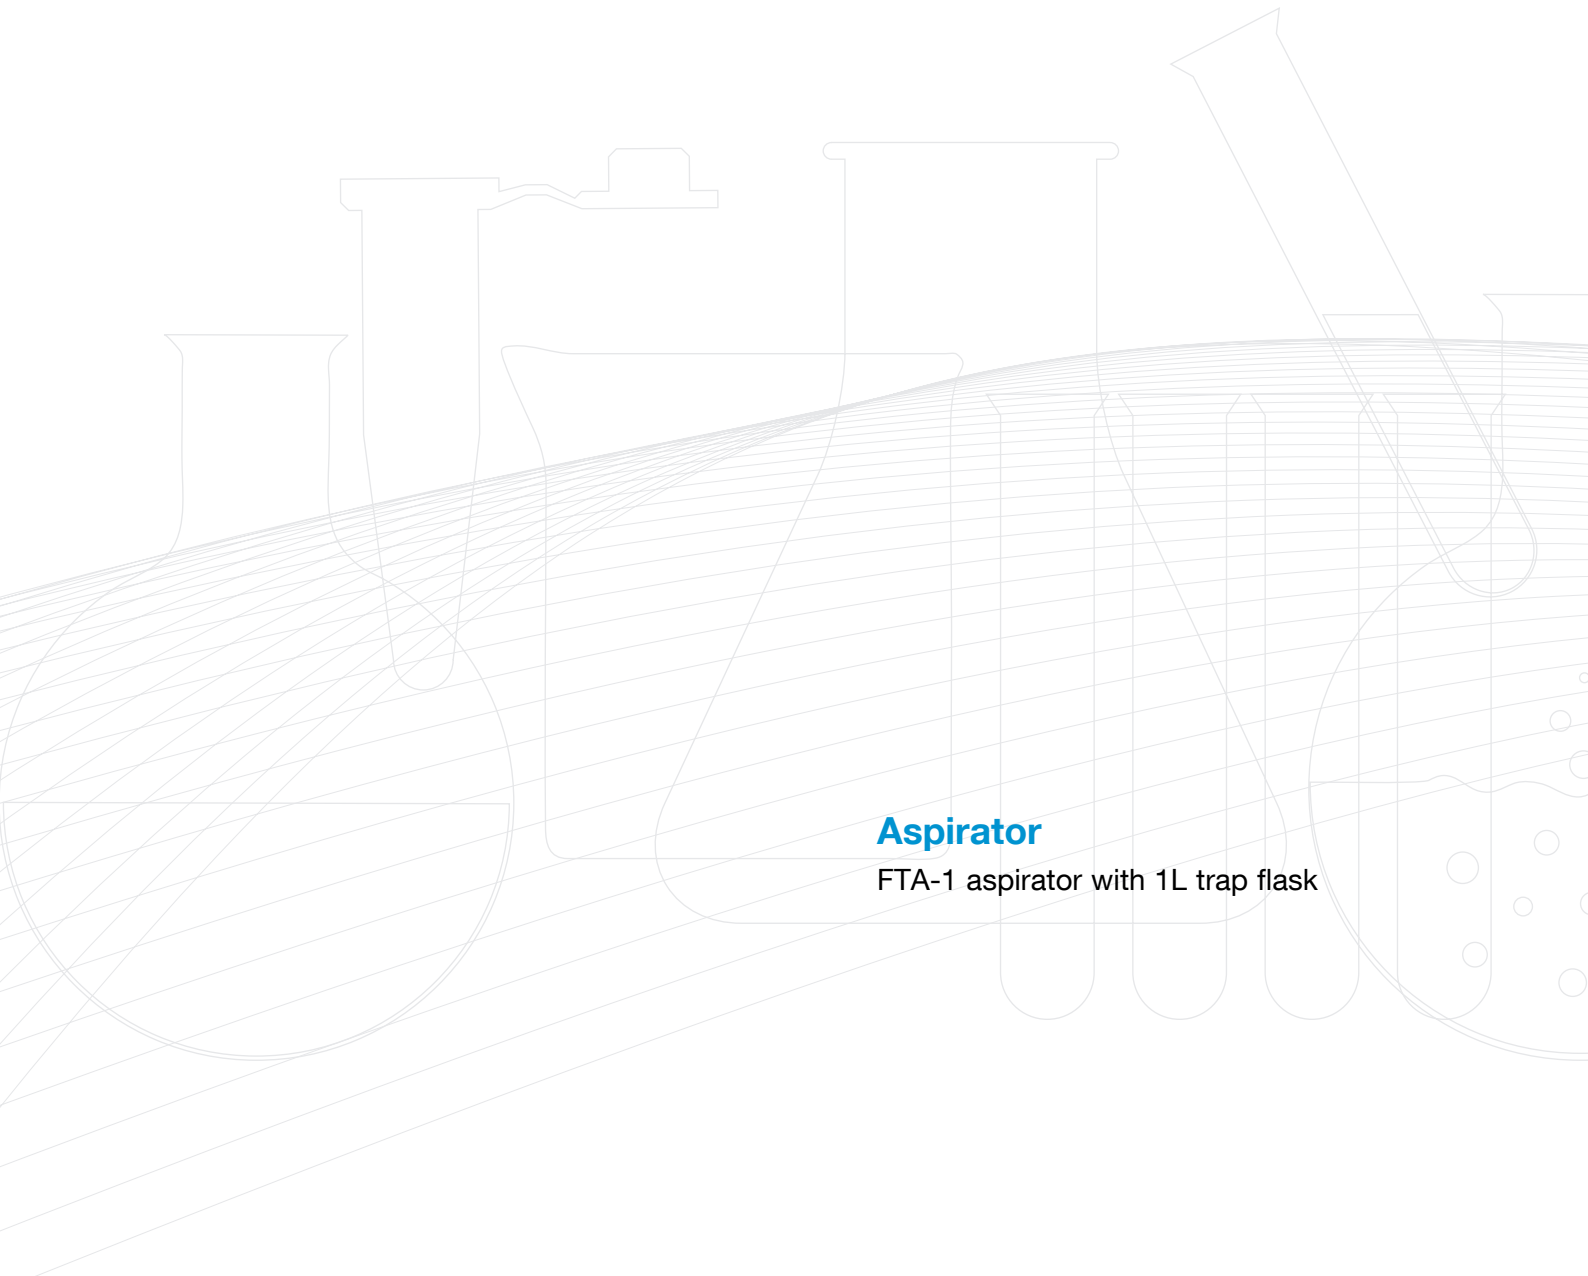
DEN MCF STDS set of liquid McFarland standards in 16mm ø glass tubes. 0.5 / 1.0 / 2.0 / 3.0 / 4.0 can be decanted into an alternative tube (shelf-life no longer valid). Requires D16 adaptor, supplied with DEN-1 / DEN-1B.	•
D16 spare tube adaptor for tubes with 16mm outer diameter. (included as standard)	•

15 Aspirator



Aspirator

FTA-1 aspirator with 1L trap flask

FTA-1 Aspirator with trap flask

Designed for routine aspiration of the supernatent alcohol/buffer from the walls of microtubes during DNA/RNA purification and other macromolecule reprecipitation techniques. An ideal personal tool for independent operation away from an in-line lab vacuum supply.

- **All in one system with integrated pump**
- **Trap flask volume 1L**
- **Fitted with hydrophobic microbiological filter**
- **Vacuum pressure: -500mbar**
- **Small, compact and easy to use**
- **Perfect for small volume aspiration**

MADE IN EUROPE

2 year warranty

The hydrophobic microbiological suction filter eliminates risk of contamination from the trap flask. Efficiency up to 99.9% - holds particles bigger than 0.027 micron

Polyethylene tube connects the collecting tip to the trap flask

Built-in micro-compressor creates negative pressure in trap flask for removal of liquid from microtubes

Slim power cord allows the unit to be used inside workstations and incubators. Safe and economical running

1L trap flask for collection of aspirate from microtubes or microplates

Tube holder accommodates two tubes to store tip or optional 8 channel adaptor

Uses standard 'yellow' 200ml pipette tips

MA-8 8 channel adaptor kit - includes tube adaptor, 8 channel aspiration tip and holder, autoclavable

Applications:

- Aspiration/removal of alcohol/buffer from microtube walls during DNA/RNA purification and other macromolecule reprecipitation techniques
- For routine operations of cell washing from culture medium and resuspension in buffer

FTA-1 Aspirator with trap flask - Technical specifications

16 PCR UV cabinets

Single benchtop general purpose PCR UV cabinets

UVC/T-M-AR general purpose PCR UV cabinet

UVT-B-AR economy general purpose PCR UV cabinet

PCR UV cabinet workstation

UVT-S-AR PCR UV workstation

PCR UV cabinets – DNA/RNA

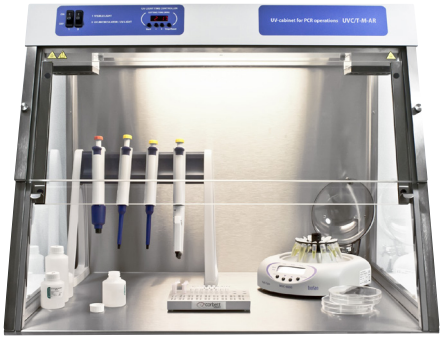
Range of advanced benchtop UV cabinets providing aseptic conditions for a variety of biomedical and biochemical procedures. Innovative dual UV system: built-in UV-air recirculator provides constant decontamination of the air volume within the cabinet while working and traditional surface UV decontamination while the door is closed.

- **UVC/T-M-AR — Stainless steel general purpose PCR UV cabinet**
- **UV cabinet UVT-B-AR — economy PCR UV cabinet**
- **UVT-S-AR double PCR workstation — stainless steel**

MADE IN EUROPE

2 year warranty

UVT-B-AR – economy UV cabinet



UVC/T-M-AR – stainless steel UV cabinet

UVT-S-AR – double PCR workstation

UVC/T-M-AR – stainless steel general purpose PCR UV cabinet

Robust general purpose stainless steel UV cabinet designed for clean operations with DNA samples, with dual UV lamp protection.

- **UV surface irradiation – via single 25W 254nm open UV lamp**
- **Patented high intensity UV air cleaner – 25 m³/hour cleaner recirculator continuous air flow with 1cm UV irradiation distance**
- **UV protection – UV-protective film on glass panels**
- **UV exposure control – 24 hour digital timer**
- **Available with access port or internal power socket**

MADE IN EUROPE

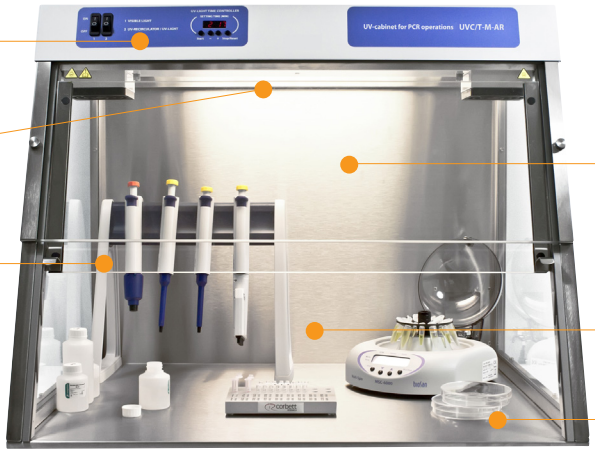
2 year warranty

Convenient, easy to use digital timer for accurate control of UV exposure.

White lamp provides local illumination of the workplace to optimise visual control during operations.

Second UV light for irradiating the surface. Automatic switch off when door is opened.

Stainless steel work surfaces, glass sides for visibility and light.



Built-in UV bactericidal cleaner recirculator increases the maximum density of UV light (in the upper hood) and generates 25 m³/h air flow exchange – prevents unwanted contamination and protects the user from direct UV light during manipulation.

Front opening with three adjustable positions for ease of access.

Quiet operation (33 - 37dBa) and low energy consumption (67W).

Applications:

- Life-science - germicidal and virucidal, inhibition of DNA and RNA contamination, applications requiring no residual decontaminants such as disinfectants, operations with DNA/RNA amplicons, microbial research

UV cabinet UVT-B-AR – economy PCR UV cabinet

Economy bench-top model for protection against contamination during a variety of DNA/RNA procedures, with dual UV lamp protection.

- **UV surface irradiation – via single 25W 254nm open UV lamp**
- **Patented high intensity UV air cleaner – 25 m^3/hour cleaner recirculator continuous air flow with 1cm UV irradiation distance**
- **UV exposure control – 24 hour digital timer**
- **Available with access port or internal power socket**
- **UV protection - UV protective film on glass panels**

MADE IN EUROPE

2 year warranty

Convenient, easy to use digital timer for accurate control of UV exposure.

White lamp provides local illumination of the workplace to optimise visual control during operations.

Shock proof glass front, stainless steel sides, metal framework and stainless steel work surface.

Patented built-in UV cleaner recirculator prevents unwanted contamination and protects the user from direct UV light during manipulation.

Second UV lamp disinfects the working area, inactivating DNA/RNA fragments during 15-30 min of exposure. Automatic switch-off when door is opened.

Contains an **integral power socket** .

Quiet operation (33 - 37dBa) and low energy consumption (67W).

Applications:

- Life-science - germicidal and virucidal, inhibition of DNA and RNA contamination, applications requiring no residual decontaminants such as disinfectants, operations with DNA/RNA amplicons, microbial research

UVT-S-AR double PCR workstation – stainless steel

Large capacity stainless steel UV cabinet with additional space for equipment and accessories to allow for more comfortable and convenient working in PCR applications. Dual UV lamp protection

- **Robust construction with large, 1.2m x 0.52m working area**
- **UV surface irradiation – dual 30W 254nm UV lamp**
- **Patented high intensity UV air cleaner – 25 m^3/hour cleaner recirculator continuous air flow with 1cm UV irradiation distance**
- **UV protection – UV-protective film on glass panels**
- **UV exposure control – 24 hour digital timer**
- **3 built-in power sockets**

MADE IN EUROPE

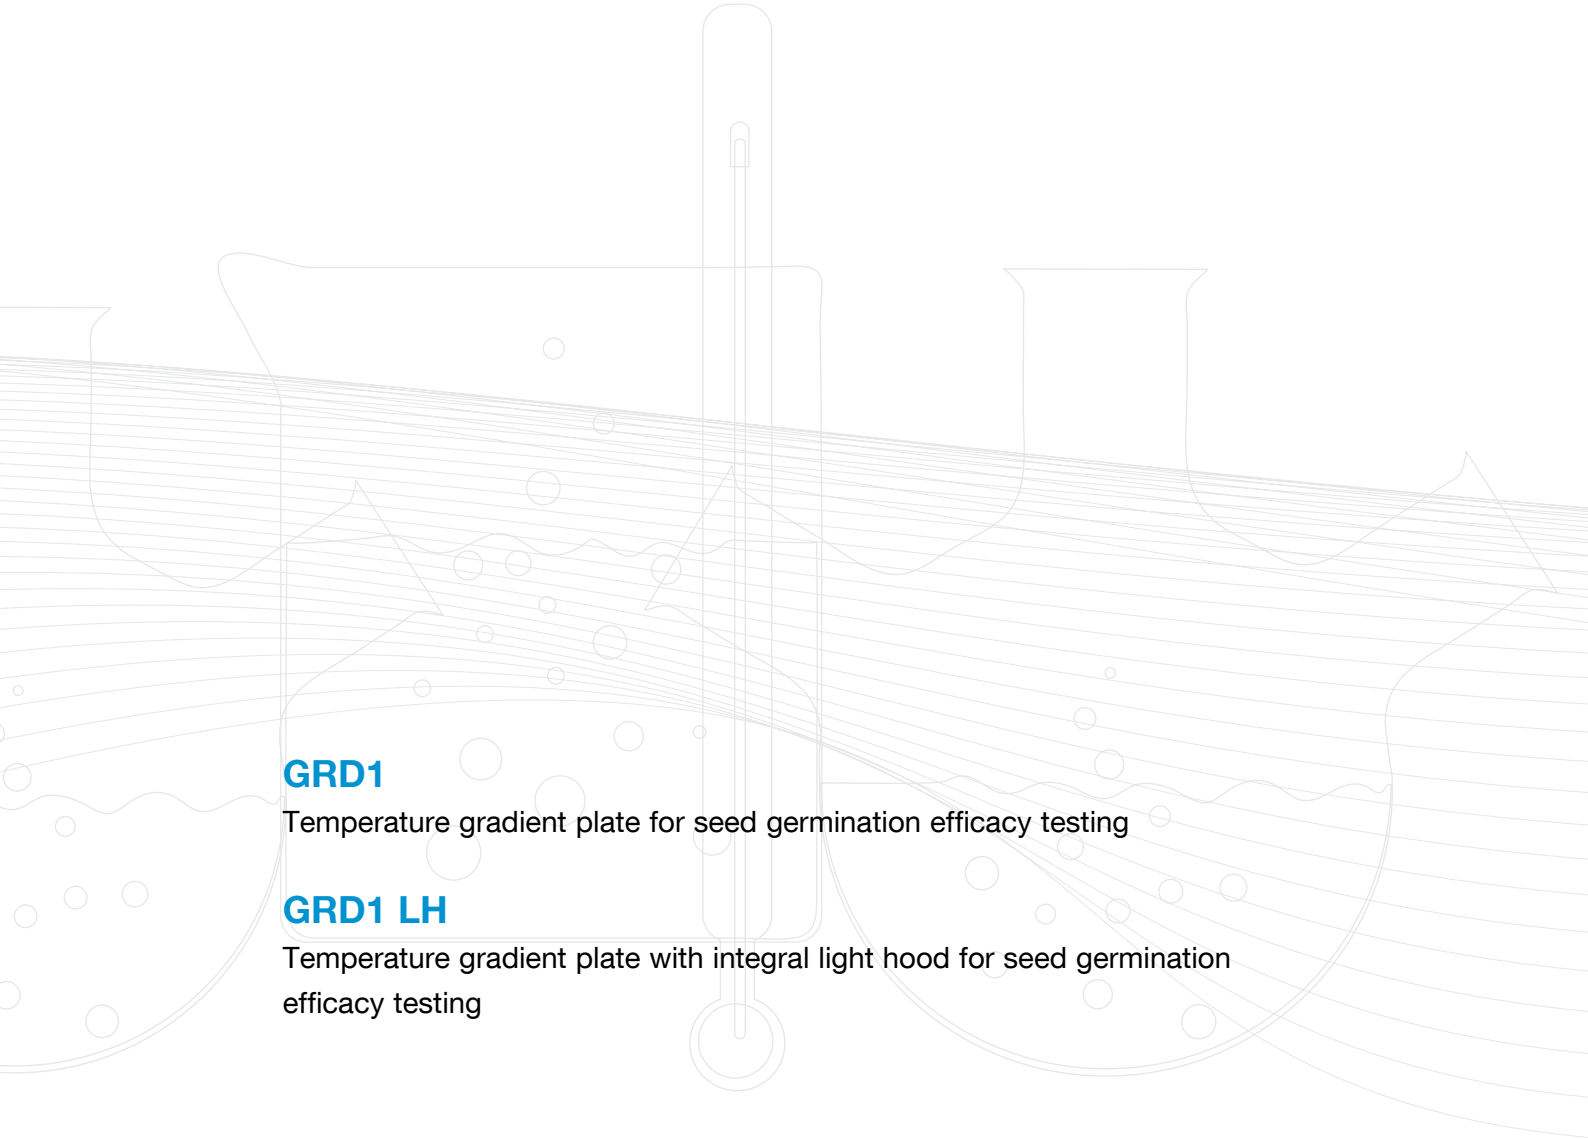
17 Temperature gradient plate



GRD1

Temperature gradient plate for seed germination efficacy testing

GRD1 LH

Temperature gradient plate with integral light hood for seed germination efficacy testing

Temperature gradient plate

Highly efficient bi-directional temperature gradient system for investigating responses to temperature shifts of seeds, small plants, insects, micro-organisms or any small component or material. The design is based on the fact that a temperature gradient results if one edge of a square aluminium plate is heated and the opposite edge is cooled.

The gradient runs in one direction for part of the 24 hour cycle and can then be automatically switched to run at a right angle to its original direction for the remainder of the cycle, to provide all possible combinations of minimum and maximum temperatures.

- **Temperature range (cold edges): +5 to 30°C**
- **Temperature range (hot edges): ambient +5 to 45°C**
- **Perspex grid divides working area into 196 mini-incubators**
- **Multi-channel Squirrel data logger (included as standard) for recording time and temperature**
- **Over temperature protection is provided on each edge by fixed temperature cut-outs**

BUILT IN BRITAIN 1 year warranty

GRD1 temperature gradient plate shown with integrated Squirrel data logger and optional light hood

Removable perspex grid effectively divides the working area into 196 miniature incubators, each with a different temperature regime – allows many samples to be tested without the need for separate controlled environment chambers.

Robust, fully integrated system. Fitted with wheels for easy maneuverability.

An adjustable timer controls the length of the two phases within the 24 hour cycle which automatically switches the gradient direction as programmed.

Multi-channel Squirrel data logger for recording time and temperature from five probes positioned underneath the plate – one in each corner and one in the centre – for post-cycle analyses on a PC.

Developed from a design originating from Dr A. J. Murdoch and Professor E. H. Roberts of Reading University, Department of Agriculture.

The Gradient Plate can be customised to suit your application, please email **salesdesk@grantinstruments.com** or call **+44 (0)1763 264 741** for further information.

Applications of the GRD1

Based on studies carried out at the University of Reading, UK:

- **Overcoming seed dormancy**

  Dormant seeds often require moist storage (stratification) to help break their dormancy. The GRD1 can help to quantify temperature effects in seeds during warm stratification as carried out by Kebreab & Murdoch, (1999a).

- **Seed germination at constant temperatures**

  The GRD1 allows germination tests to be carried out over a very wide range of temperatures for both dormant and non-dormant seeds. Interaction with other factors such as water stress and chemicals can also be studied and modelled as was done by Kebreab & Murdoch (2000).

- **Seed germination at alternating temperatures**

  The GRD1 will operate with the temperature gradient for part of the day in one direction and then at right angles to that direction for the rest of the day. Thus the GRD1 can provide 196 different thermal environments. The effects of constant and alternating temperatures at two thermoperiods were quantified in several species by Kebreab & Murdoch (1999b).

  With many plants, particularly small-seeded species, the GRD1 provides an extremely powerful tool (Murdoch et al., 1989). Optimum temperatures are easily identified and sufficient data is available to understand and model the responses to temperature. Interactions with dormancy-relieving factors may also be investigated.

- **Germination rates**

  The GRD1 has been invaluable in such studies as the evaluation of thermal time required for germination. Examples include Ellis & Barrett (1994) and Kebreab & Murdoch (1999C).

- **Other applications**

  Apart from the size constraints (the GRD1 is suitable for samples up to 30mm in diameter); uses are only limited by imagination. For example, parasitism of insects by nematodes has been tested by Ratnasinghe and Hague (1998). Our GRD1 and GRD1 LH are in use worldwide as critical tools in various fields, namely:

Seed Preservation	Kew Gardens and other establishments worldwide (particularly Australia and China) within the Millennium Seed Project Partnership.
Biofuel Research	Ceres, California USA.
Food Crop research	Scottish Crop Research, International Rice Research Institute (IRRI), Philippines.
Plant Pest Diagnostics	California Department of Food & Agriculture (CFDA).

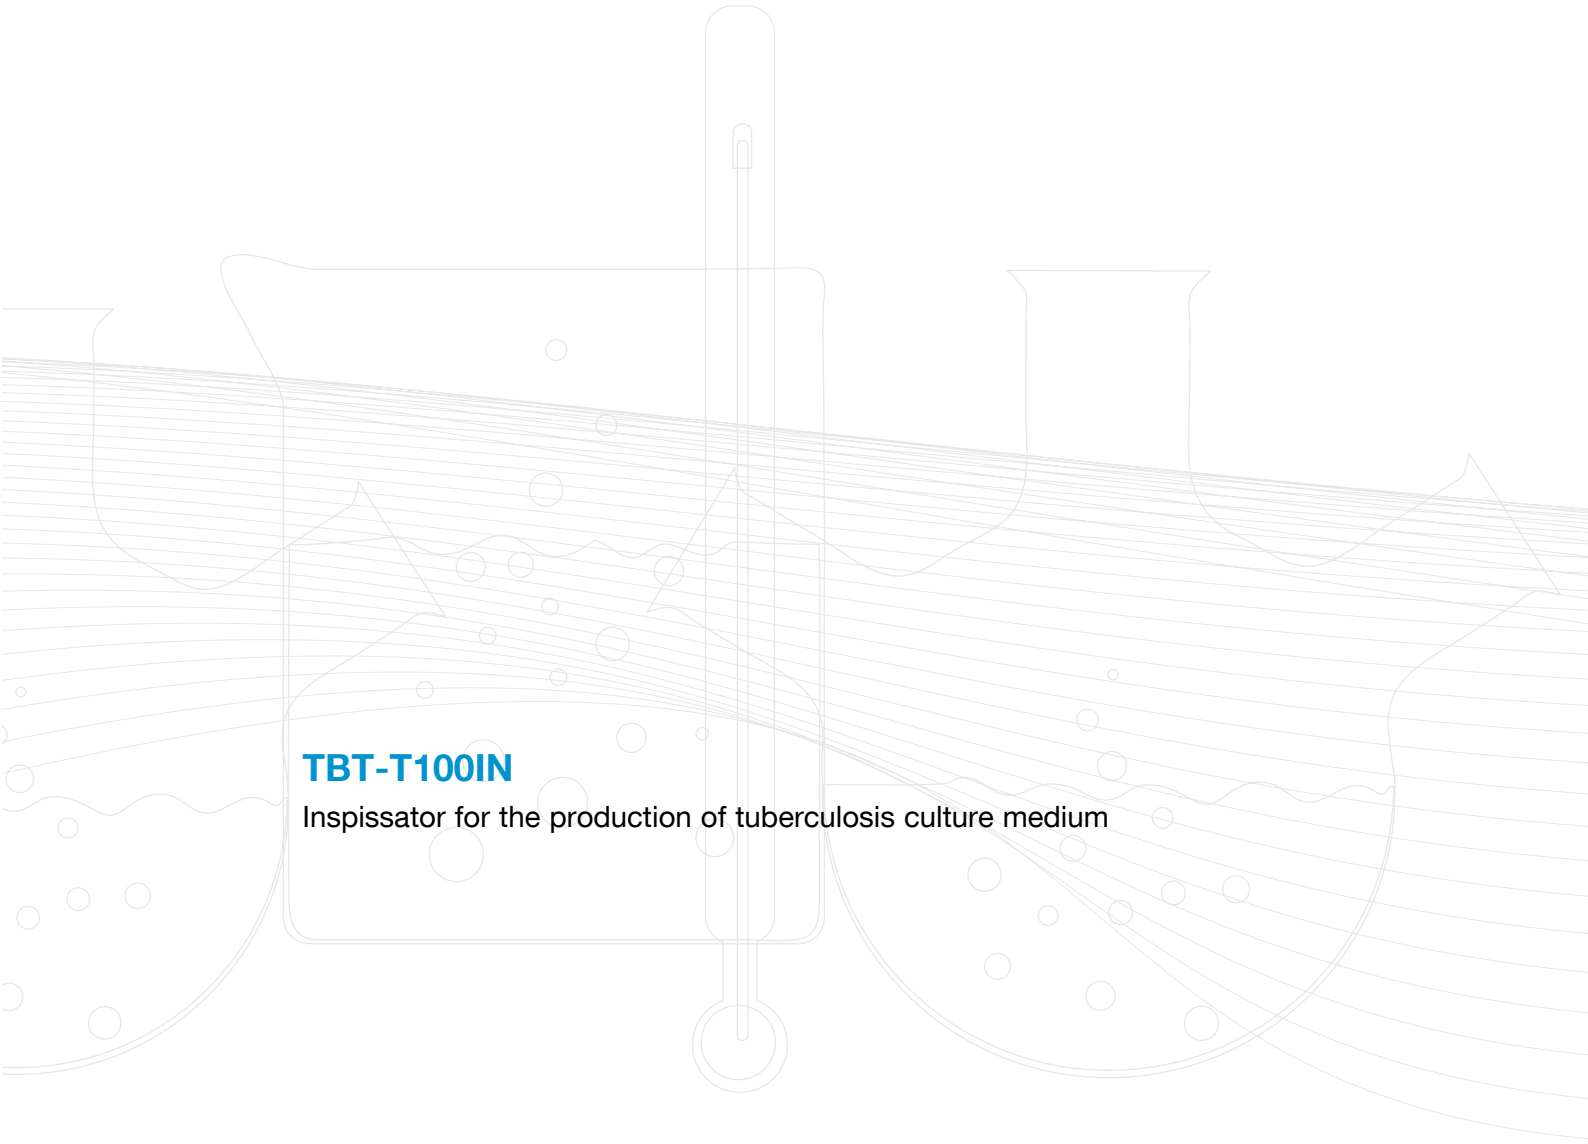
18 Inspissator



TBT-T100IN

Inspissator for the production of tuberculosis culture medium

Inspissator for the production of tuberculosis culture medium

Convenient and effective system designed to produce large batches of uniform tuberculosis culture medium four to six times per day. Vessels containing culture medium are incubated on a shallow tray which is in contact with water held at a constant temperature of 85ºC within a tank, ensuring that the temperature of the vessels is constant. Inspissation takes 50 minutes at 85ºC.

- **Robust durable design, with digital temperature control**
- **Standard temperature: 85ºC; temperature range ambient +5ºC to 100ºC**
- **Capacity for up to 156 test tubes (16mm diameter x 150mm long) or 162 universal containers**

BUILT IN BRITAIN 3 year warranty

Water temperature under the tray is controlled by a digital heated circukator for accuracy and reproducibility of set temperature. All moving parts are incorporated in the control unit which is easily removed for cleaning.

Constant level device maintains required liquid level for optimal operation.

Clear 4 digit display - easy to read from a distance for instant re-assurance.

An insect resistant blanket and quilt are placed over the containers to provide thermal insulation and exclude draughts.

A fixed over temperature cutout protects users, valuable samples and the workplace.

Robust and durable construction – the tray, tank and outer case are made of polished stainless steel.

Developed in conjunction with Professor Mitchison of the Royal Postgraduate Medical School of London University and used in a number of tuberculosis laboratories which are assisted by the World Health Organisation (WHO).

According to the statistics of the WHO, TB kills more young people and adults than any other infectious disease in the world. It causes more deaths than AIDS and Malaria combined. Although the use of penicillin and antibiotics have caused the decline of this disease in some countries, hot spots of this illness still exist in eastern Europe, south east Asia and sub-Saharan Africa. Numbers that were seemingly beginning to decrease began to rise again in the 1980's with the emergence of AIDS. Scientists now say that the number of people with TB around the world has reached a ten year high. The very cost effective Grant Inspissator means that it is used extensively in these areas and assists in the diagnosis of this serious disease.

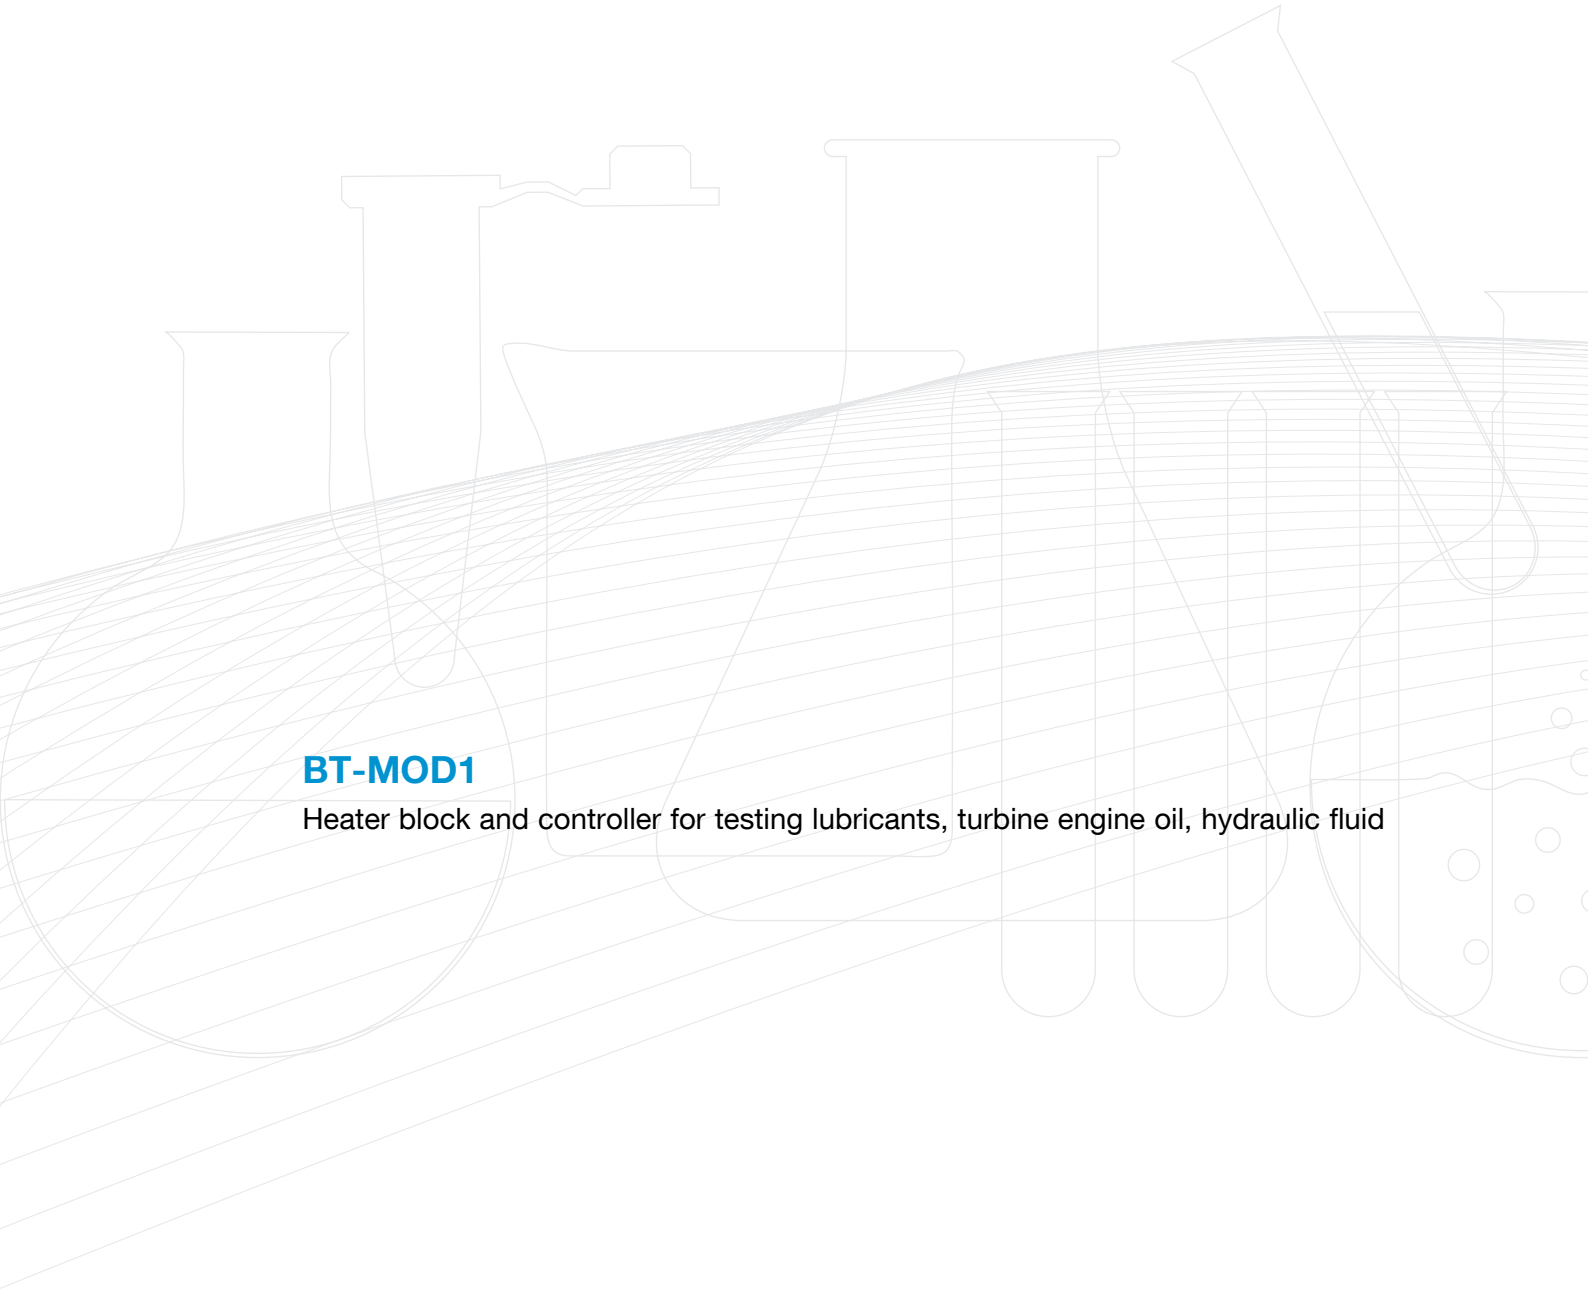
19 MOD heat transfer apparatus



BT-MOD1

Heater block and controller for testing lubricants, turbine engine oil, hydraulic fluid

BT-MOD1 Defence Standard 05-50 (Part 61) heat transfer apparatus

Heater block and controller manufactured and specified within the Ministry of Defence, Defence Standard 05-50 (Part 61), methods for testing fuels, lubricants and associated products. Part 61: Methods for Testing Gas Turbine Engine Synthetic Lubricants.

- **The 'heat transfer apparatus' specified in Methods 1, 3, 9, 14 and 22 Annex A, A.1 and A.2**
- **Temperature range: ambient +10°C to 450°C**
- **Temperature display resolution: 0.1°C**
- **Uniformity within the block: ±0.5°C**

BUILT IN BRITAIN 1 year warranty

The unit holds:
3 x confined heating test vessels or air condensers together with
12 x oxidation apparatus blowing tubes or
12 x elastomer compatibility test tubes or
12 x corrosivity blowing tubes and condensers.

Dry block heating system ensures a clean environment.

Digital controller for accurate and reproducible time and temperature setting.

Very easy to use – simply plug into the mains, set the required temperature and allow the unit to heat up.

An over temperature cut out with alarm red flashing beacon keeps the products safe from overheating.

LED display for actual and set temperature for instant reassurance.

Clients: Defence and military, aerospace, petrochemical and contract test companies UK and worldwide.

Applications: Lubricant testing, turbine engine oil testing, hydraulic fluid testing.

Since the Second World War, no lubrication problem has offered a greater challenge to chemists than that posed by the aircraft gas turbine engine. Mineral oils provided satisfactory lubrication of piston-engine aircraft for many years, but had obvious limitations as far as jet engines. The need for new lubricants became evident. The requirements of satisfactory lubricants for aircraft gas turbine engines were discussed in 1947 by Williams, who proposed certain tentative test methods and pointed out the limitations of the mineral oils currently in use. At that time, research on potential synthetic lubricants had begun both in the U.K. and in the U.S.A. During the next four or five years, bench engine tests were carried out followed by flight trials in aircraft. In the UK specifications were laid down in the Defence Test Standards.

Grant was approached by a major engine manufacturer to develop an electronically controlled heat transfer block for conducting tests as per methods 1, 3, 9, 14 and 22 for evaluation of synthetic engine lubricants as stated in the Defence Standard 05-50 (Part 61) Issue 2, Methods for testing Gas Turbine Engine Synthetic Lubricants.

Grant designed and developed the block heater which went through a series of stringent tests to ensure that the device was capable of maintaining the required sample temperature stability and uniformity.

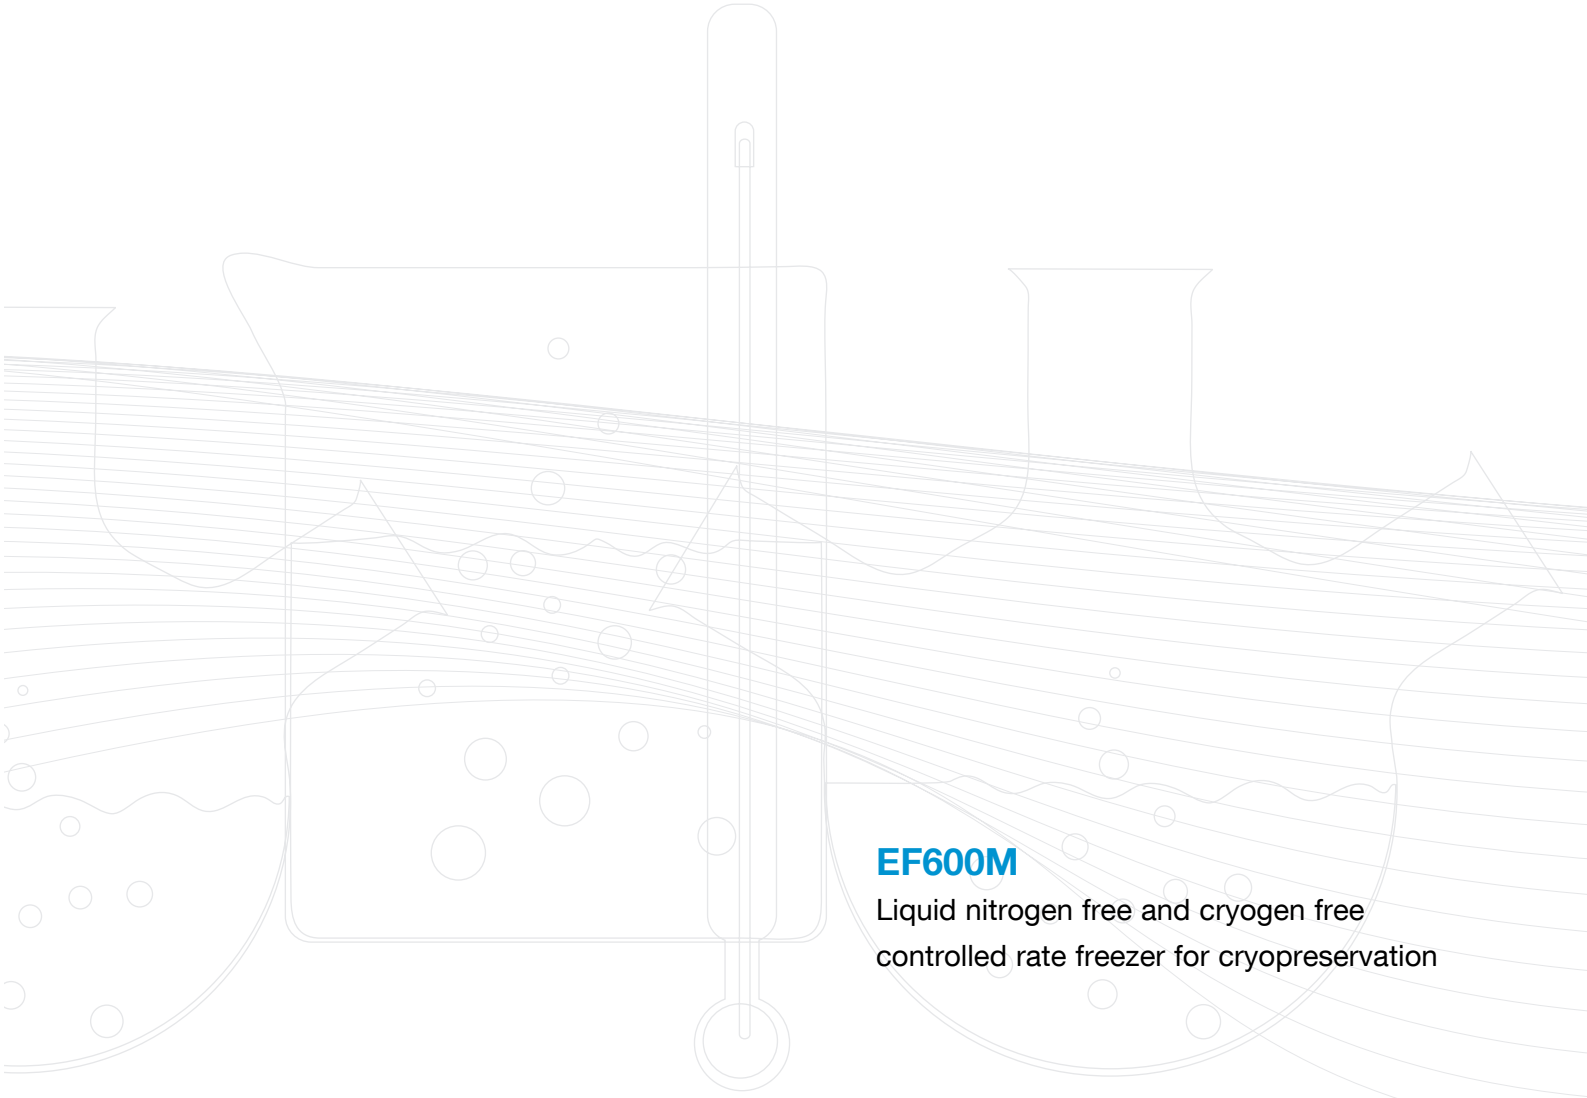
20 Cryopreservation



EF600M

Liquid nitrogen free and cryogen free controlled rate freezer for cryopreservation

Asymptote EF600M

Liquid nitrogen free and cryogen free controlled rate freezer for research into the cryopreservation of a wide range of material including: embryos, stem cells, mammalian cells, spermatozoa, antibodies, tissue sections and rodent organs. **The EF600M brings accuracy, precision and reproducibility to biological cryopreservation.**

Unlike conventional liquid nitrogen based controlled rate cooling equipment, the EF600M poses no contamination risk and can be used in cleanrooms and barrier facilities. The EF600M fits neatly and quietly on a bench-top and its performance in terms of cell viability after freezing is comparable or better than standard liquid nitrogen freezers. As alcohol is not used, there is also no potential fire risk. The EF600M will cool down to -100˚C with straws.

The cooling rate of the EF600M is precisely controlled, ensuring accuracy and reproducibility throughout the freezing profile, especially for the important nucleation/seeding phase. This ensures optimal recovery of cells upon thawing. Operation is simple and can be carried out with or without a PC; data can be logged via PC software and cooling profiles are directly displayed. Different cooling profiles are available from a drop down menu and customised profiles can be written.

BUILT IN BRITAIN

3 year warranty

Main applications

The EF600M is highly versatile and can be used for the cryopreservation research of a wide range of samples in cryovials, straws, bags, microplates and Matrix-96-well block plates in the following areas:

- Transgenic embryos research
- Stem cell research
- Clinical and research samples, e.g. lymphocytes and tissue cell lines in conventional cryovials
- Various mammalian cells including cardiomyocytes, adipose, liver and muscle
- Cord blood derived stem cells
- Adherent cells and stem cells in microplates
- Cell suspensions in numbered/barcoded arrays
- Robotic integration – the EF600M has also successfully been integrated into robotic systems

Key benefits/features

- Accurate and reproducible control of cooling rates and sample temperatures
- Easy to use and samples can be nucleated/seeded in-situ
- Linear and non-linear cooling profiles
- Low running costs: estimated at 1% of liquid nitrogen controlled rate freezing
- Temperature remains at -100˚C at the end of cycle for straw applications until freezer is switched off
- Uninterruptible Power Supply (UPS): complete cycle run if power fails (supplied as an optional accessory)
- CE marked (laboratory use)
- Servicing and calibration available
- 3 year warranty

Product range

The range includes various models each providing optimum performance for a specific and common vessel, or vessels for the combined heads including:

• **EF600M 100**	Plate for 16 x 0.5ml CBS high security straws
• **EF600M 101**	Plate for 18 x 0.3ml IMV straws
• **EF600M 102**	Plate for 55 x 1.8ml cryovials (0.5ml max fill)
• **EF600M 103**	Flat plate for various items/vessels
• **EF600M 104**	Plate for cryocyte bag (available as a “Special” only)
• **EF600M 105**	Plate for 1 x SBS microplate
• **EF600M 106**	Plate for 55 x 1.8ml cryovials (1.0ml max fill)
• **EF600M 107**	Plate for 10 x 0.5ml CBS high security straws & 12 x 1.8ml cryovials (0.5ml max fill)
• **EF600M 108**	Plate for 12 x 0.3ml IMV straws & 12 x 1.8ml cryovials (0.5ml max fill)

Accessories

- **Cryopen ice nucleating tool:**
  A small nitrous oxide cryosurgical device which uses the rapid expansion of sterile N_2O to induce ice nucleation (“seeding”) in the samples. The gas does not compromise the sterility of the operating environment.
- **Backup electrical supply:**
  Uninterruptible Power System (UPS) capable of running the freezer for a 3 hour cycle in the event of an electrical power failure.

21 OEM and Private Label projects

Grant's core competencies

Water baths
Ultrasonic baths
Block heaters
Circulating baths and refrigeration units
Centrifuges
Shakers, rockers, mixers and rotators
Densitometers

OEM and Private Label projects

Grant Instruments has been developing and supplying controlled heating, cooling and sample preparation equipment for over 60 years. Our products are used worldwide in scientific education, research and industry. Grant is renowned for its high quality products and innovative design which is why we are the partner of choice for companies looking to embark on private label or OEM projects.

We have partnered with many large and small companies working in a wide variety of fields including life-science, petrochemical testing, defence, semi-conductor, industrial and health care. Our team of engineers, project and product managers are experts in the processes needed to deliver OEM and private label projects on time and to budget.

- **Constant temperature equipment: water baths, ultrasonic baths, block heaters, circulating baths and refrigeration units**
- **Centrifugation**
- **Shakers, rockers, mixers, rotators and densitometers**

Project examples:

- You are a life-science company looking to bundle a consumable with a complimentary instrument for a specific application
- You are developing a larger system which requires an equipment component to deliver sample preparation or thermal control
- Your company is looking to expand its product range and is seeking a piece of sample preparation or thermal control equipment to compliment the range
- You are a distributor and wish to develop your own brand of products

Why choose Grant?

- With hundreds of products successfully developed and marketed to date we have both the capabilities and the resources to act as your perfect partner for OEM and private label projects
- We operate an ISO certified project delivery process which ensures your requirements efficiently transition into a quality finished product
- We consistently achieve excellent vendor ratings, covering on-time delivery, quality and service

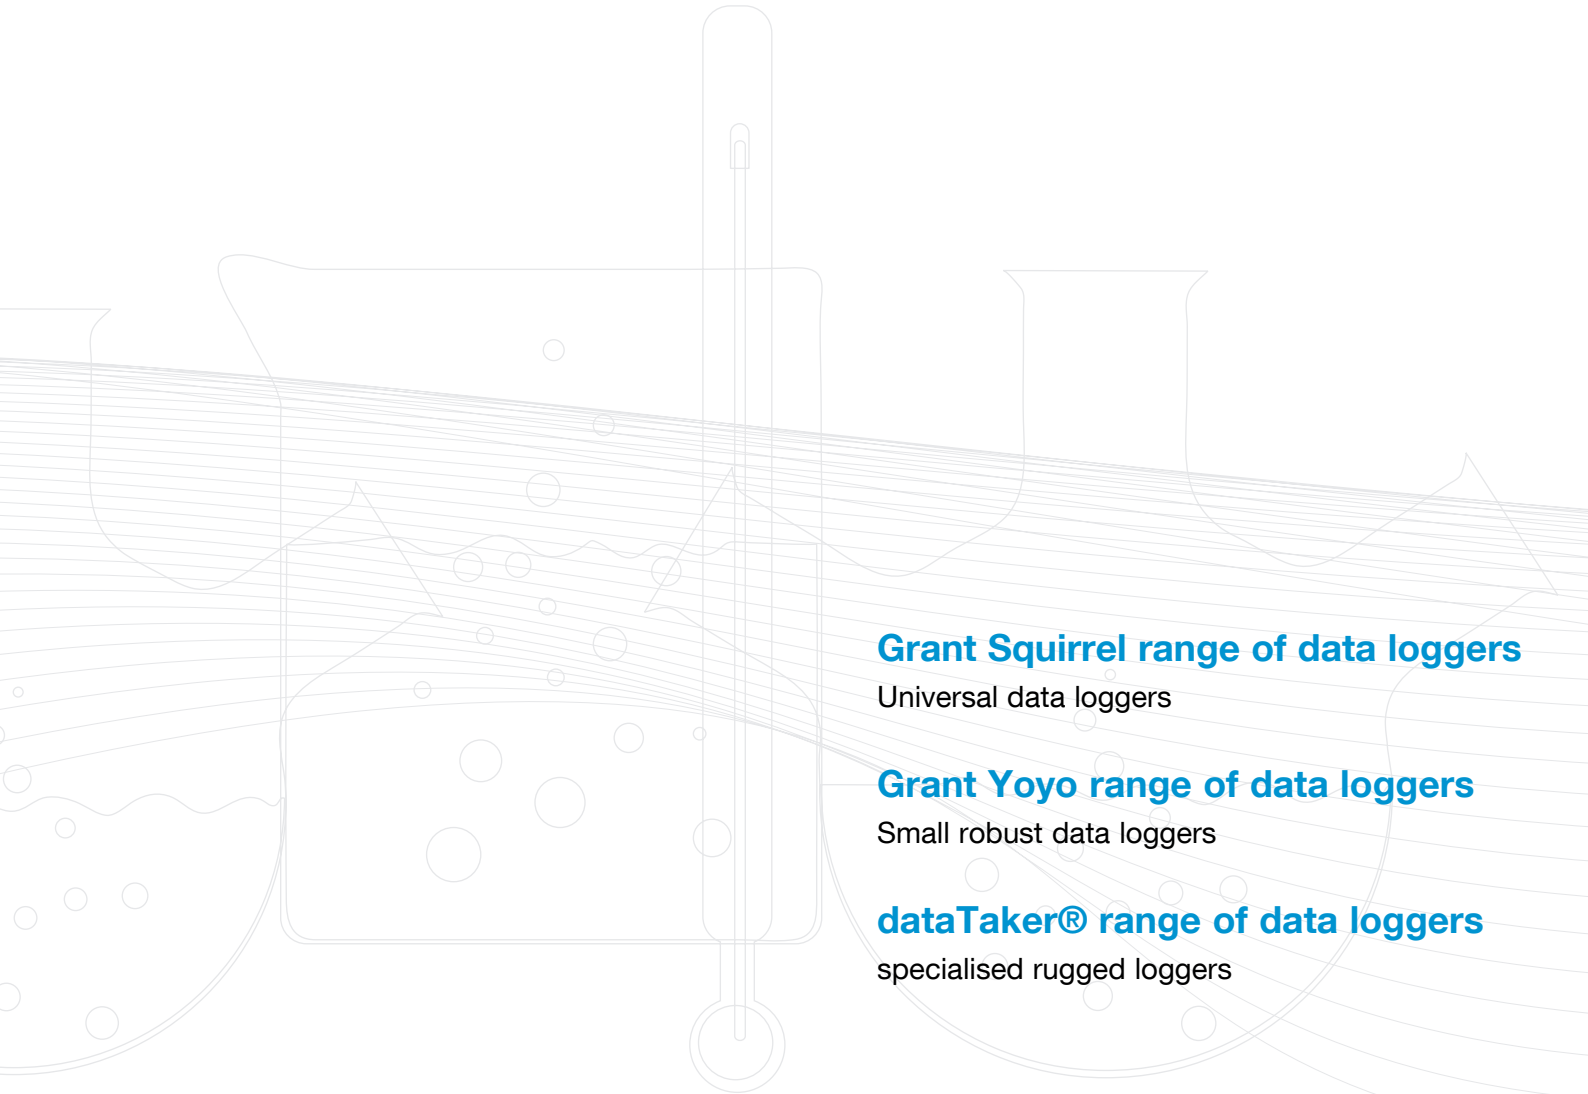
22 Grant Data Loggers



Grant Squirrel range of data loggers
Universal data loggers

Grant Yoyo range of data loggers
Small robust data loggers

dataTaker® range of data loggers
specialised rugged loggers

Grant data loggers

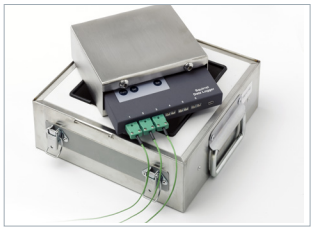
Grant Instruments offers three different ranges of data loggers - the Squirrel range of universal data loggers, the Yoyo range of small robust data loggers and the dataTaker® range of specialised rugged loggers, providing solutions from simple logging requirements to complex industry specific logging.

Grant Squirrel range of data loggers

The Grant Instruments Squirrel range of data loggers are easy to use, hand held, battery powered data loggers which can also be powered via a standard power socket (110-250 volts).

They set the standard for portable data loggers, with their simplicity of operation, very high accuracy of measurement, universal data inputs which can accept virtually any type of sensor signal and their excellent reliability.

The complete Squirrel range offers from 4 to 32 analogue sensor inputs channels, full Wi-Fi, USB and Ethernet connectivity and come complete with the sophisticated SquirrelView configuration and analysis software. Data logging is now truly possible “out-of-the-box”.

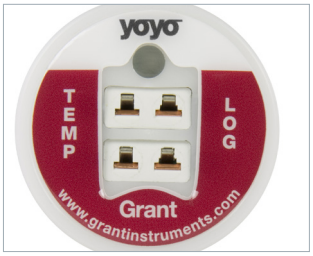


Grant Yoyo range of data loggers

The Yoyo range of data loggers are simple, battery operated, yet highly robust data loggers for measuring multiple types of physical parameters depending on the model. They feature high accuracy readings in a small, very robust enclosure. The range include models with integrated measurement sensors, fixed external sensors and/or fully programmable input for interchangeable sensors.

They are used to measure parameters such as humidity, light, voltage, current, pressure and temperature. Due to their small size, they can be placed almost anywhere (indoors or out) and left unattended to collect data on the local conditions.

Yoyo loggers are suitable for a wide range of applications in environmental monitoring, agriculture, laboratories, R&D and building monitoring.



dataTaker® range of data loggers

dataTaker® is one of the world's leading brands of rugged, multi-purpose data loggers. The dataTaker® product range includes specialised products for environmental, industrial, geotechnical and scientific data capture and analysis.

These data loggers are compatible with almost all types of sensors and offer a high degree of programmability, thereby being ideal for remote or complex record/control applications found in the process, manufacturing and heavy industries.

They feature a wide array of local and remote communication options allowing them to be placed in the area/region required whilst the user can be situated a long distance away and still easily access the data.

For further information email **salesdesk@grantinstruments.com** or phone **+44 (0)1763 264 741.**

Other data acquisition products

Grant affiliate Eltek, part owned by Grant Instruments and also based near Cambridge, specialises in the design and manufacture of wireless data logging systems based on the Squirrel data logger. The Eltek GenII radio data logging system enables sensors to be connected to the Receiver Logger by means of a radio link, ideal where communications across a river, road or simply a large site need to be established quickly and effectively. Typical applications include monitoring of buildings (homes, cold stores, warehouses, museums, galleries, etc.), ground water monitoring and 'through process' monitoring in food production.

Please visit **www.eltekdataloggers.co.uk** for more information.

23 General information

General information

Safety

All Grant laboratory equipment meets the requirements of International Standard IEC 61010-1, safety requirements for electrical equipment for measurement, control, and laboratory use and IEC 61010-2-010, particular requirements for laboratory equipment for the heating of materials.

The above international standards are also published as European (EN 61010) and British (BS EN 61010).

All plastics used in Grant laboratory equipment are resistant to acids and to common laboratory solvents, and meet classification FVO or FV1 of IEC 707 (equivalent to V-0 or V-1 of UL94).

Electrical supplies

Standard Grant laboratory equipment is available at 230V, 50Hz. Most standard equipment is available at 120V, 60Hz. See individual specifications for details.

Environmental conditions

Grant laboratory equipment is designed for indoor use in laboratory conditions, with room temperature between 5°C and 40°C, and 80% relative humidity up to 31°C unless stated otherwise.

CE mark

All Grant laboratory equipment bears a CE mark to indicate that it meets the requirements of all applicable European Directives.

Compliance with the Low Voltage Directive is demonstrated by meeting BS EN 61010 (see paragraph above on safety) and the EMC Directive by meeting BS EN 61326-1: EMC requirements for electrical equipment for measurement, control and laboratory use.

Where appropriate Grant laboratory equipment conforms to BS EN 61326-1 Class B except where indicated.

Class B equipment is for use in domestic establishments, and in establishments directly connected to a low voltage power supply network which supplies buildings used for domestic purposes.

Class A equipment is suitable for use in establishments other than domestic and those directly connected to a low voltage power supply network, which supplies buildings used for domestic purposes.

Quality

The Grant Quality Management System complies with the requirements of BS EN ISO 9001:2008. It is Grant's policy to supply customers with products which are fit for their intended purpose, safe in use, perform reliably to published specifications and are backed by a fast and efficient customer service.

Aftersales service

In the United Kingdom, repairs are carried out within three to five working days of arrival at our factory, or receipt of authorisation to repair. Refrigeration systems may take a few days longer, as they require more prolonged testing after repair. Alternatively, spare parts and service manuals can normally be despatched within two working days.

Most distributors of Grant equipment outside the UK hold stocks of spare parts, have their own service engineers and operate a similarly prompt repair service.

Guarantee

Grant equipment is robust and reliable, designed and built to provide years of trouble-free service.

All standard Grant scientific equipment is guaranteed for three years against faulty materials and workmanship. Grant-bio equipment is guaranteed for two years, and application-specific equipment for one year. If repairs are carried out under guarantee, no charge is made for labour or materials, and within the United Kingdom we make no charge for carriage.

Performance figures

Except for refrigerated products, performance figures quoted apply to equipment used in ambient temperature between 10°C and 35°C. See individual specifications for details.

Stability figures quoted for baths/circulators are derived from tests made in accordance with DIN 58966 or DIN 12876. Both DIN standards require measurements to be taken as follows:

- at one point in the middle of the bath
- at one temperature
- during '100 fluctuations'
- without any test tubes or flasks in the baths
- stable ambient temperature
- stable supply voltage

Stability figures calculated using DIN 58966 discount the worst 25% of all temperature fluctuations.

The measurement procedure for stability of block heaters is similar, with measurements taken in the centre of a block.

Uniformity is measured at 37°C, using water in a bath, unless stated otherwise. Uniformity is defined as half the maximum temperature difference between any two points in the working space of a bath, or between any two tubes in a block heater.

We recommend the following liquids for use in Grant baths:

-50°C to 30°C:	Silicone oil - low viscosity (Bayer silicone M3)
-30°C to 30°C:	50% water, 50% antifreeze (inhibited ethylene glycol)
0°C to 30°C:	80% water, 20% antifreeze (inhibited ethylene glycol)
5°C to 99.9°C:	Water
70°C to 150°C:	Silicone fluid (viscosity ~20cS, flash point ≥230°C, fire point ≥280°C)
70°C to 200°C:	Silicone fluid (viscosity 50cS, flash point ≥285°C, fire point ≥340°C)

Worldwide availability and support for Grant laboratory equipment

Grant laboratory equipment and specialist technical support is available worldwide. Please visit **www.grantinstruments.com** for further product information and to locate your locally appointed distributor and support centre.

As Grant Instruments is committed to a continuous programme of improvement, specifications may be changed without notice.

About Grant Instruments

Founded in 1952, Grant Instruments (Cambridge) Ltd is a world renowned supplier and manufacturer of scientific, life science and data acquisition products.

The company has been designing, manufacturing and distributing scientific products for over 60 years and has established a worldwide reputation for high quality, reliable and robust systems designed to satisfy the most demanding applications for research, monitoring and temperature control across the globe.
